|---|-----|
| Introductory Remarks<br>by Michel Breger, Editor  | iii |
| <b>Scientific Papers</b>  |     |
| Observations of candidate oscillating eclipsing binaries<br>and two newly discovered pulsating variables<br>by A. Liakos, and P. Niarchos   | 2   |
| NGC 1817: the richest population of $\delta$ Scuti stars<br>by M. F. Andersen, T. Arentoft, S. Frandsen, L. Glowienka,<br>H. R. Jensen, and F. Grundahl   | 9   |
| The frequency spectrum of periodically modulated sinusoidal oscillation<br>by B. Szeidl, and J. Jurcsik   | 17  |
| Effects of resolution and helium abundance in A star surface convection<br>simulations<br>by F. Kupka, J. Ballot, and H.J. Muthsam  | 30  |
| Survey of Candidate Pulsating Eclipsing Binaries - I<br>by S. Dvorak  | 64  |
| Automated extraction of oscillation parameters for Kepler observations<br>of solar-type stars<br>by D. Huber, D. Stello, T. R. Bedding, W. J. Chaplin, T. Arentoft, P.-O. Quirion,<br>and H. Kjeldsen | 74  |
