Excursion 1

The Alps from a Munich Perspective

An Excursion to Explore the Relationship of a Peri-Alpine Metropolis with “its” Mountains

The field trip is related to the topic of the Forum Alpinum 2010 and especially to Plenary Session 1.

On selected sites we will observe the new trend “back to the city” (reurbanisation), the history of urban sprawl (suburbanization), the rise of new service centres outside the agglomeration (post-suburbanisation) and the trends of ex-urbanisation and amenity migration. The route leads from

Munich to Mittenwald, on the return there might be the possibility to visit a monastery and to make a coffee break.

Fig. 2: Garmisch-Partenkirchen is a popular recreational area for Munich citizens. The town is also becoming of increasing importance to lifestyle migrants from the metropolis.

Fig. 1: Destinations of Lifestyle Migrants from Munich.

Excursion 2

Can Berchtesgaden National Park Defy Climate Change?

An Excursion to Germany's Only Alpine National Park — Trip to the “Eiskapelle” Between Watzmann and Königssee

The excursion to Berchtesgaden National Park starts with a 45 minute cruise across the Königssee. Along the way to the peninsula of St. Bartholomä the captains of the Bavarian Lake Shipping Company will let the famous echo of the Königssee resound across the water. Having arrived at St. Bartholomä, we will first take a look at the world-renowned chapel and then begin the hike with a visit to the information center of the national park. The following section of the road will take us steadily uphill, through the “Eisgraben” and past the little chapel of St. John and Paul. Having walked for 90 minutes and ascended 250 meters, we will reach the mighty head of the valley and the “Eiskapelle” at the foot of the Watzmann.

The “Eiskapelle” is a snow and ice field which is situated at a low sea level (of approximately 800 to

1000 meters) and lasts all year long. The snow from the east wall of the Watzmann accumulates at the foot of the wall and piles up huge masses, creating an impressive geotope. Hikers are surprised at the chill of the downslope winds at the “Eiskapelle” even during the summer months. Even though many Alpine glaciers are shrinking due to the climate change, the “Eiskapelle” keeps expanding and undergoes a constant transformation. After a rest, we will descend back down to the Königssee.

The excursion will be accompanied by a ranger as well as the director of the national park, Dr. Michael Vogel. The expert will elucidate the special phenomenon of the “Eiskapelle” and, as well as presenting numerous animal and plant species encountered along the road, will also report on the tasks and goals of Berchtesgaden National Park.

The “Eiskapelle” at the foot of the Watzmann.

Excursion 3

“Did you see my Alps? The Story of Jewish Pioneers in and for the Alps”

Guided Tour of the Exhibition at the Alpines Museum des Deutschen Alpenvereins

The excursion takes us to the exhibition “Did you see my Alps?” at the Alpines Museum München.

It was organised by the Jüdisches Museum Hohenems and by the Jüdisches Museum Wien in cooperation with the Austrian and German Alpenverein.

The exhibition invites us to take a fresh look at the history of alpinism. It sheds a light on the significant role Jewish mountaineers and artists, touristic pioneers and intellectuals, scientists and collectors played in the discovery and exploration of the Alps.

Ever since Moses, the “first” mountaineer in history, Jews have searched for spiritual experience and the laws and limits of reason at the borderline between heaven and earth, nature and spirit. To this day, the Alps are a central meeting place of religious Jews from all over the world.

In the 20th century, however, the Alps turned into a battle ground of politics and ideologies. “The Alps are no longer the ‘Playground of Europe’, but a field of exercise for soldiers, the breathtaking show case of nature no more a ‘moralistic’, but now a military institution”, writes Joseph Braunstein, the Viennese alpinist and musician, in 1936 — only a few years before his emigration to the USA. And he was

Kippah with edelweiss, gentian and alpine rose that was fashioned in Tel Aviv in the 1950s and sent by an emigrant to her Viennese-born nephew in 1958. Photograph: Alpines Museum München / on loan by Robert Menasse, Vienna.

not only referring to the “battle” for the Eiger north face, but also to the aryanisation of the Alpenverein, which had already been enforced by the 1920s. The situation in Munich and Germany as well as in the German section of the Alpenverein is the central focal point of the exhibition.

Programme

ForumAlpinum 2010
Metropolises and “their” Alps
Munich (Germany), 6–9 October 2010
Bavarian Academy of Sciences
and Humanities
www.forumalpinum.org

Wednesday, 6 October 2010

13.00 Welcome-Apéro

14.00 Opening

Dietmar Willoweit, President of the Bavarian Academy of Sciences and Humanities
Markus Söder, Bavarian State Minister of the Environment and Public Health
Jean-Jacques Brun, President of the International Scientific Committee on Research in the Alps
Mitja Pavliha, President of the Permanent Committee of the Alpine Conference

15.00 Plenary Session 1

Interactions metropolises – Alps

Introduction/presentation: **Axel Borsdorf**
Axel Borsdorf: The spatial tension between the Alps and the peri-Alpine metropolises – a contradictory process showing the simultaneity of non-simultaneous developments
Werner Bätzing: The Alps – periurbanisation in a rural macro-region in Europe
René L. Frey: Alpine fallows and economic perspectives of the Alps
Gerlind Weber: Challenges to rural areas from an Austrian perspective

17.30 Workshops Plenary Session 1

1/1 Traditional and innovative forms of migration – sustainable future for the Alps? (**Manfred Perlik**)
1/2 Traffic between metropolises and the Alps – do we need to search for new systems and strategies? (**Rudolf Juchelka**)

1/3 “And the winner is ...” – the metropolisation of the Olympic Winter Games in the Alpine space (**Thomas Busset**)

1/4 Mountains and the metropolitan mind: urbanization, imagination, and the preservation of Alpine nature (**Patrick Kupper**)

19.30 Buffet with poster presentation

Thursday, 7 October 2010

8.00 Plenary Session 2

Climate change: from mitigation to adaptation. A common concern for the Alps and adjacent metropolises

Introduction/presentation: **Heinz Veit**

Martin Beniston: Impacts of climate change in the Alps and consequences for water availability and use

Andreas Matzarakis: Assessment of weather and climate for health and tourism in the Alps

Stefan P. Schleicher: Energy systems of the future: New perspectives for efficiency and renewables

Blanka Bartol / Patricia Quillacq: Policy: Climate Action Plan of the Alpine Convention: climate-neutral Alps by 2050 – must or utopia?

10.30 Workshops Plenary Session 2

2/1 Adaptation to climate change in the Alps (Alpine Space projects) (**Marion Damm**)

2/2 Climate neutral development: discussion of expert studies for Munich and for the Alps (**Stefan Lechtenböhmer / Johannes Venjakob**)

2/3 Climate response measures – we must think one step ahead! Is everything we do in the name of climate change really sustainable? (**Wolfgang Pfefferkorn**)

2/4 Alpine Club Yearbooks, journals and other heritage data: digitisation and scientific analysis (**Martin Volk / Noah Bubenhofer**)

13.45 Young Scientists Poster Award ceremony

14.00 Plenary Session 3

Biodiversity benefits for and from the Alps

Introduction/presentation: **Jean-Jacques Brun / Roland Psenner**

Ulrike Tappeiner / Erich Tasser: Biodiversity in the Alps: anthropogenic changes and related effects on ecosystem properties

Annamaria Giorgi / Massimo Pecci: Biodiversity: an opportunity generator for mountain territories

Josef H. Reichholf: Centres of biodiversity in the Alps and instructive comparisons within the city of Munich

Mario F. Broggi: Urban life styles and resource use in the Alps: between Heidiland and wilderness

Stefan Leiner: The EU Biodiversity and Nature Policy: opportunities for the Alps

16.30 Workshops Plenary Session 3

3/1 Biodiversity monitoring (**Thomas Spiegelberger / Eva-Maria Koch**)

3/2 Ecological networks within and beyond the Alps (**Leopold Füreder / Christian Walzer**)

3/3 Mountain sustainability. Transforming research into practice (**Axel Borsdorf**)

3/4 Future of mountain agriculture (**Urs Gantner**)

19.30 Official reception by the Lord Mayor of the city of Munich

Friday, 8 October 2010

8.00 Plenary Session 4

Georisks and geo-resources

Introduction/presentation: **Hans-Peter Bunge**

Domenico Giardini: Earthquakes in alpine regions – a threat to our cities!

Reinhard F. J. Hüttl: Energy from renewable resources: the example of geothermal energy

Peter Höppe / Wolfgang Kron: Damage caused by natural disasters: trends in Europe with a focus on the Alps

Christian Pfister: The „disaster gap“ of the 20th century and the loss of traditional disaster memory

Mauro Pascolini: Risk and migration: the Friuli Earthquake 1976 – from profound fear to new immigration

10.30 Workshops Plenary Session 4

4/1 Seismic risks (**Hans-Peter Bunge / Joachim Wassermann**)

4/2 Landslides, permafrost and glaciers – increasing mass movement as a sign of global warming (**Ludwig Braun / Christoph Mayer**)

4/3 Geothermal energy (**Reinhard F. J. Hüttl**)

4/4 Integrated water management in the Alps (**Karl Schwaiger**)

14.00 Plenary Session 5

The Alps and peri-Alpine metropolises: a competitive European macro-region

Introduction/presentation: **Didier Michal**

Dirk Ahner: The concept of European macro-regions

Christian Ude: Metropolises gaze at the Alps: Munich without the Alps?

Nicolas Evrard: Cooperation between Alpine regions and adjacent metropolises: first steps towards a macro-regional strategy?

Paul Messerli: Contours of Europe's Alpine Space macro-region: outlook

16.30 Round Table: The Alpine Space macro-region: towards a common vision?

Presentation: **Monika Seynsche** (Deutschlandfunk)

Participants: **Christian Ude** (Munich), **Kurt Puchinger** (Vienna), **Corine Mauch** (Zurich), **Sergio Chiamparino** (Turin), **Miran Gajšek** (Ljubljana),

Mitja Pavliha (Alpine Convention), **Christian Salletmaier** (Alpine Space Programme), **Marc Nitschke** (Übersee a. Chiemsee)

Saturday, 9 October 2010

8.15–16.15 Excursion 1:

The Alps from a Munich perspective. An excursion to explore the relationship of a peri-Alpine metropolis with „its“ mountains

7.45–18.30 Excursion 2:

Can Berchtesgaden National Park defy climate change? An excursion to Germany's only Alpine national park

9.30–12.00 Excursion 3:

„Did you see my Alps? The story of Jewish pioneers in and for the Alps“.

Guided tour of the exhibition at the Alpines Museum des Deutschen Alpenvereins
