The Names of the Kings of the Fifth Dynasty According to Manetho

In: Kamil O. Kuraszkiewicz, Edyta Kopp, Daniel Takács (edd.), *The Perfection that Endures ... Studies on Old Kingdom Art and Archaeology, Old Kingdom Art and Archaeology VI*, Warsaw, 133–174.

DOI: https://doi.org/10.1553/ERC_757951_Gundacker_OKAA_VI

Abstract

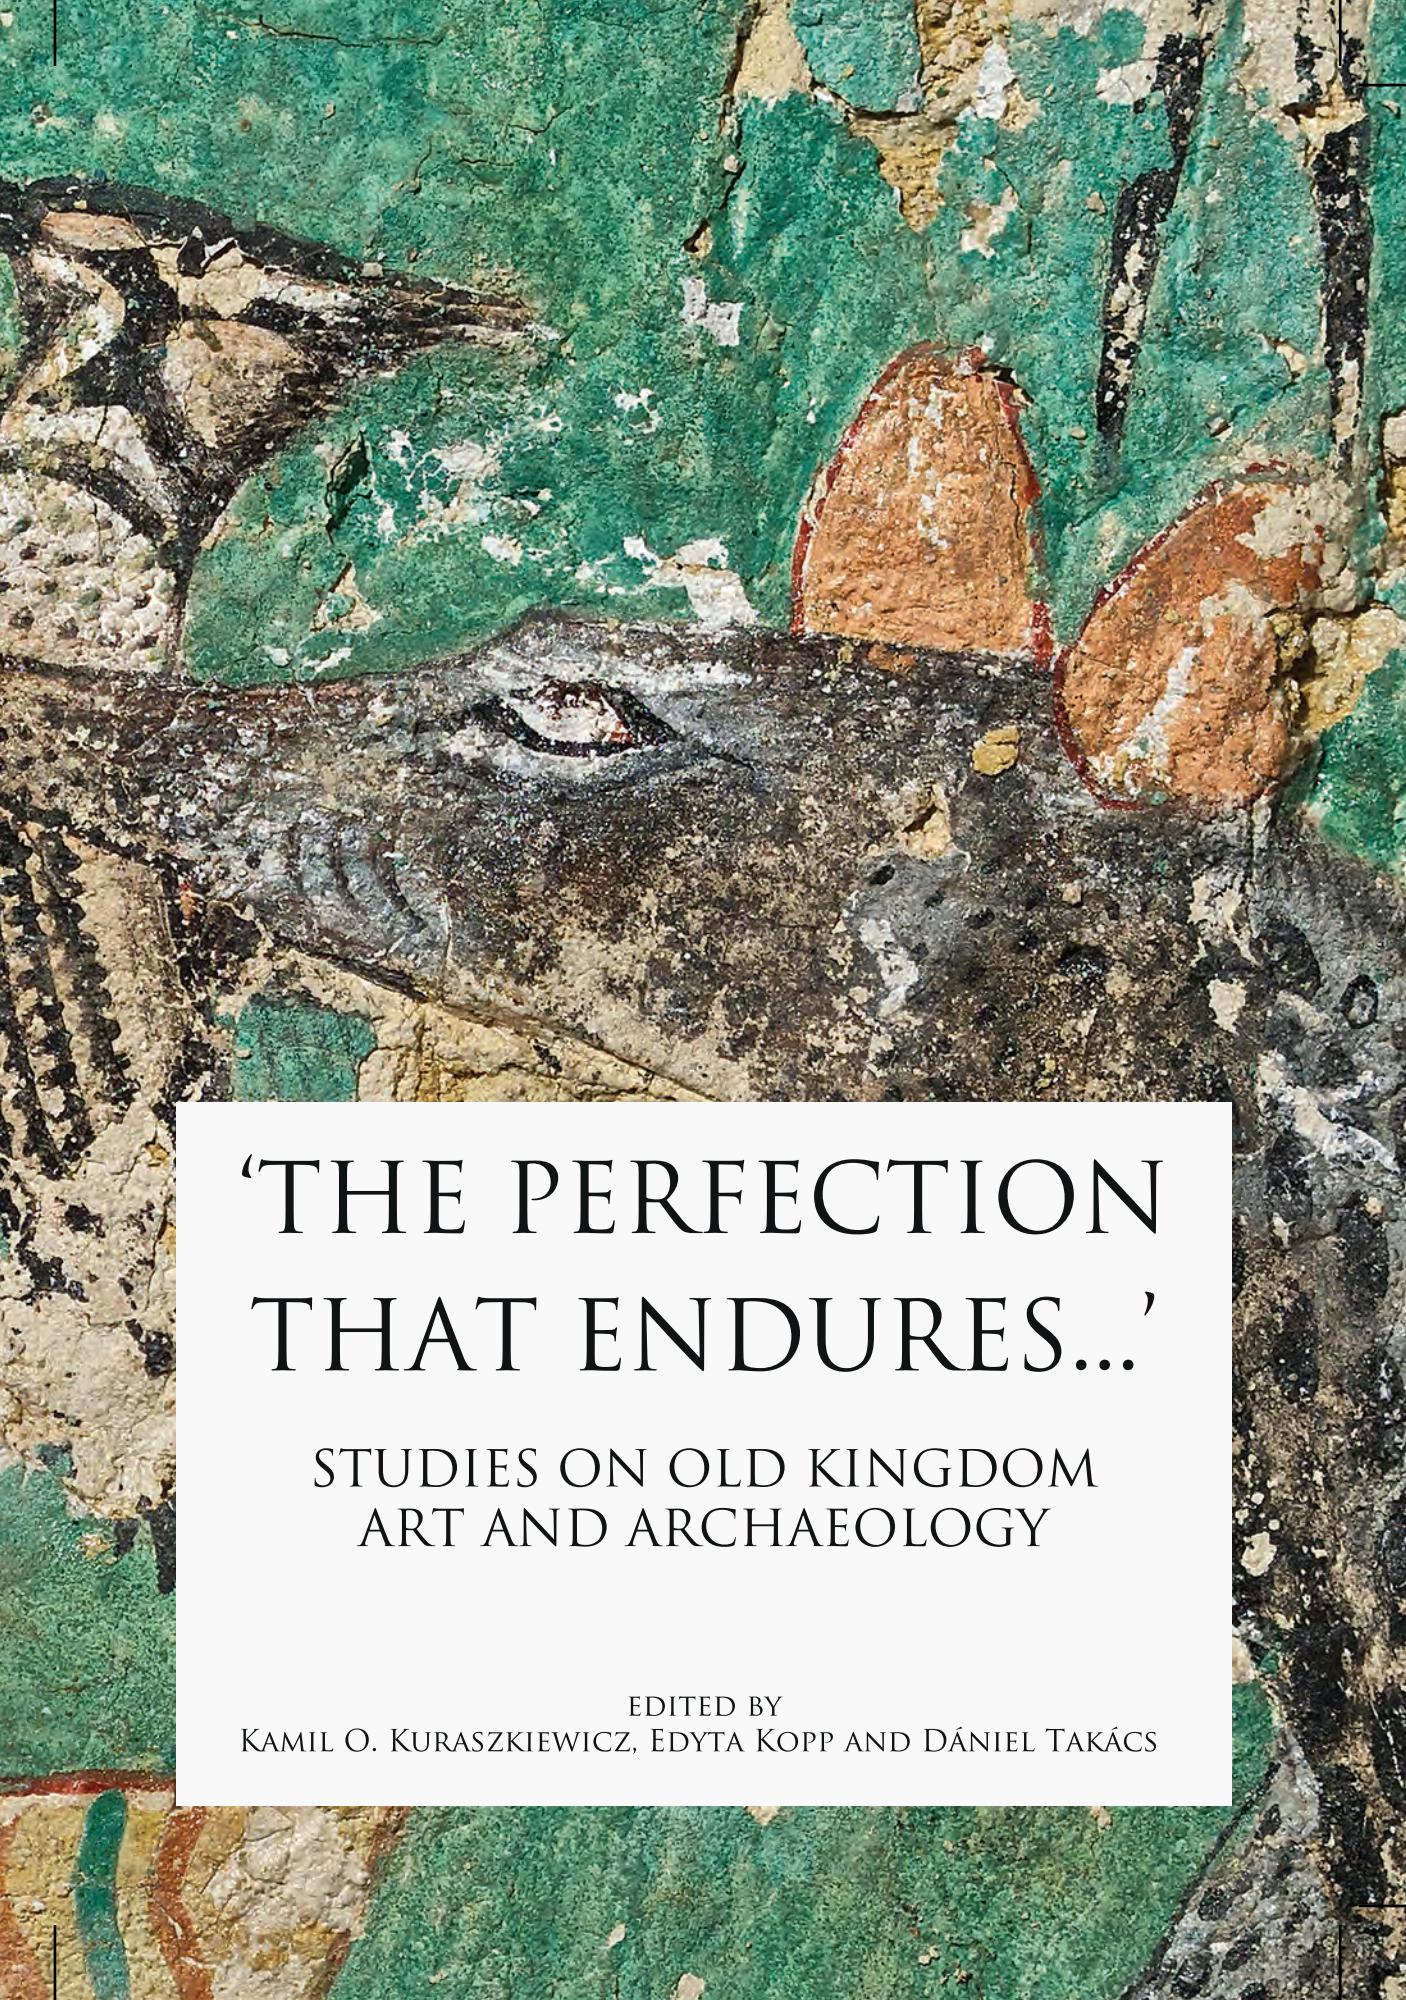

The names of the kings of the Fifth Dynasty may serve as a prototypical example for the reevaluation of Manetho's king-list: Userkaf, Sahure, Neferirkare, Shepseskare, Reneferef, Nirewoser, Djedkare-Isesi and Unas are all recorded in the king-list of Manetho as transmitted by Sextus Julius Africanus according to the Ecloga chronographiae of George Syncellus. Although the names as preserved have obviously suffered on a long way of copying manuscripts over and over again, a closer look at the Greek transcriptions reveals the high quality and the still unbroken relevance of Manetho's Aegyptiaca for modern Egyptological scholarship, when dealing with chronology, onomastics and linguistics. As will be shown, there is a line, identifiable with variable degrees of difficultly but finally clearly discernible, which leads all the way down from the Old Kingdom to Manetho's Aegyptiaca.

PREFACE

The history of the Old Kingdom Art and Archaeology meetings has started in 1991, which was aptly summarised by Miroslav Bártá in his Foreword to the 2004 proceedings.* The conference that took place at the University of Warsaw in July 2014, was organised by the University of Warsaw, Polish Academy of Sciences and the Pułtusk Academy of Humanities. The present volume contains twenty-nine of forty-eight papers that were actually presented by:

THE NAMES OF THE KINGS OF THE FIFTH DYNASTY ACCORDING TO MANETHO'S AEGYPTIACA

Roman Gundacker

Abstract

The names of the kings of the Fifth Dynasty may serve as a prototypical example for the re-evaluation of Manetho's king-list: Userkaf, Sahure, Neferirkare, Shepseskare, Reneferef, Nirewoser, Djedkare-Isesi and Unas are all recorded in the king-list of Manetho as transmitted by Sextus Julius Africanus according to the Ecloga chronographiae of George Syncellus. Although the names as preserved have obviously suffered on a long way of copying manuscripts over and over again, a closer look at the Greek transcriptions reveals the high quality and the still unbroken relevance of Manetho's Aegyptiaca for modern Egyptological scholarship, when dealing with chronology, onomastics and linguistics. As will be shown, there is a line, identifiable with variable degrees of difficulty but finally clearly discernible, which leads all the way down from the Old Kingdom to Manetho's Aegyptiaca.

1. Manetho and his writings – an overview

Manetho and his main work, the *Aegyptiaca* (Αἰγυπτιακά),¹ were considered the backbone of Egyptian history for a long period of time, ever since the decipherment of the hieroglyphs in the early 19th century.² However, as archaeological surveys and the translation of genuine Egyptian texts proceeded, corrections which contradict Manetho's account became necessary.³ As a result, his king-list was viewed with growing doubt and sometimes even judged as being entirely unreliable.⁴ It is certainly true that, in certain parts, there is a discrepancy between Manetho's account and contemporaneous data, which, to some extent, is due to garbled or simply wrong information compiled by Manetho,⁵ but, to an even greater extent, this discrepancy came about during the centuries of handing down a text very prone to errors, because Greek and Byzantine scribes were totally unfamiliar with all those alien royal names and endless strings of numbers which record the appurtenant regnal lengths. It is thus indispensable to investigate and to interpret Manetho's king-list just as it is necessary to evaluate and to interpret archaeological data and contemporaneous inscriptional material. Every effort to evaluate Manetho therefore needs to consider the Egyptian origins and the Greek tradition of this text in order to get progressively closer to its historical core.⁶

It is, moreover, essential to bear in mind the circumstances and setting⁷ of Manetho and his work. Although information on these matters is very limited,⁸ ancient authors, for example⁹ Flavius Josephus,¹⁰ Plutarch¹¹ and Tertullian,¹² accept the historian Manetho, usually called ὁ Αἰγύπτιος ‘the Egyptian’¹³ or ὁ Σεβεννύτης ‘the Sebennyte’,¹⁴ as a historical person.¹⁵ And, indeed, there are sparse, but convincing hints supporting them: above all, a papyrus¹⁶ found at el-Hibeh from 241 BC must be mentioned, which makes reference to a high-ranking priest called Manetho and which is the only attestation of the name ‘Manetho’ (actually the dative ΜΑΝΕΘΩΩΙ)¹⁷ in a Greek document from Egypt; this papyrus is perhaps the only contemporaneous testimony from Manetho’s lifetime in the early Ptolemaic Era. Another interesting piece of evidence is the base of a marble bust, now lost, which was found in the Old Serapeum of Carthage and which also bore the name ‘Manetho’ (ΜΑΝΕΘΩΝ).¹⁸ This, moreover, perfectly fits the tradition that Manetho was a religious authority involved in the installation of the cult of Serapis¹⁹ and Ptolemaic cult politics in general. However, additional information on Manetho is

only found alongside quotations from works written by himself or secondarily attributed to him.²⁰ Flavius Josephus provides the sole example of a quotation from Manetho's *Aegyptiaca* themselves in his apologetic treatise *Contra Apionem*,²¹ which, however, only covers the Hyksos Period and the New Kingdom. All other information derived from the *Aegyptiaca* originates from the so-called *Epitome* (Ἐπιτομή), which is an *extrait général* compiled by an unknown excerptor perhaps sometime during the 1st century BC and which consisted of an annotated king-list.²² The remains of this *Epitome* are found with the histories of the Christian chronographers²³ Sextus Julius Africanus²⁴ and Eusebius Pamphilus Caesariensis,²⁵ but their writings have also been lost, and thus it is only an Armenian translation²⁶ of Eusebius' work and extensive quotations made by George Syncellus,²⁷ a Byzantine monk writing towards the end of the 8th century AD, which provide what today is known as the Manethonian king-list. Manetho's 'Sacred Book' (Ἡ ἱερὰ βίβλος),²⁸ perhaps a compendium of Egyptian mythology and religion, is mainly known from quotations in Plutarch's *De Iside et Osiride*.²⁹ Secondarily, when Manetho had become a figure of pagan identification,³⁰ an astrological book, the *Apotelesmatica*

²⁰ Among these are mostly minor works only known from later quotations (cf. LAQUEUR 1928; KROLL 1928) such as Πρὸς Ἡρόδοτον 'Against Herodotus', actually a secondary compilation of Manetho's critical remarks on Herodotus as found in his *Aegyptiaca* (WADDELL 1942, pp. 204-207; JACOBY 1923-58, vol. IIIC, № 609 F13 (cf. F1); cf. (Ἀποτελεσματικά),³¹ and another king-list, the ‘Book of Sothis or The Canicular Cycle’ (Ἡ βίβλος τῆς Σώθεως ἢ ὁ κυνικὸς κύκλος),³² were ascribed to Manetho. This process was promoted by the fact that Manetho was styled a pagan icon in contrast to the Jewish-Christian tradition. The last source to mention is the Byzantine lexicon *Suda* (Σοῦδα),³³ which provides additional material on that matter. According to the *Suda*, there were two Manethos.

Manetho of Mendes (Μανέθως Μένδης τῆς Αἰγύπτου),³⁴ who is a blend of Manetho of Sebennytos, the historian, and Ptolemy of Mendes,³⁵ who in the 1st century BC composed another history of Egypt, also called *Aegyptiaca* (Αἰγυπτιακά).³⁶ Surprisingly, Manetho is here only credited for the book Περὶ κατασκευῆς κυφίων ‘On the Production of Kyphi’.³⁷

Manetho of Diospolis in Egypt or Sebennytos (Μανέθως Διοσπόλεως τῆς Αἰγύπτου ἢ Σεβεννύτης),³⁸ who is a blend of Manetho of Sebennytos,³⁹ the historian, and Manetho of Diospolis, the apparent author of the oldest parts of the *Apotelesmatica*.⁴⁰ In line with this, Manetho is said to have authored the books Φυσιολογικά ‘Physical Matters’ and Αποτελεσματικά ‘Astrological Matters’.

Another matter of great importance is the sources of Manetho and their quality.⁴¹ Wolfgang Helck⁴² pointed out that Manetho’s *Aegyptiaca* are the confluence of late copies of king-lists which continue the tradition of those of Abydos,⁴³ Saqqarah⁴⁴ and the Royal Canon of Turin.⁴⁵ Furthermore, the glosses given with names of kings of the first three dynasties⁴⁶ hint at the

existence of copies of the Old Kingdom Royal Annals⁴⁷ in New Kingdom temples and even in Ptolemaic temple libraries, which is corroborated by remarks found in Ramesside inscriptions⁴⁸ as well as with Diodorus of Sicily and Herodotus.⁴⁹ But Manetho also knew of supplementary sources now lost,⁵⁰ be it additional king-lists of separate tradition,⁵¹ be it historical accounts and copies of royal inscriptions comparable to the Berlin leather roll.⁵² Furthermore, Manetho must have been familiar with the works of Greek historians and ethnographers such as Herodotus and

Hecataeus of Abdera.⁵³ About 60 years ago, Wolfgang Helck⁵⁴ published a first in-depth evaluation of this array of questions, but his results need critical re-evaluation in the light of Donald B. Redford's⁵⁵ examination of Egyptian historical consciousness and tradition and other recent research.⁵⁶ Regrettably enough, one major problem still has not been addressed at all: the processing of Egyptian historical data from Egyptian (Demotic) sources⁵⁷ and its reception in Greek historiography.⁵⁸ In this respect, it is particularly important to look for the rules applied when transcribing Egyptian names with Greek characters,⁵⁹ and what may have happened to all these alien names when Greek scribes tried to emend and to correct⁶⁰ foreign and, in part, seemingly corrupted names.⁶¹ The royal names of the Fifth Dynasty function as an illustrative example for all this, and they furthermore demonstrate the indispensable value of Manetho's work. Similarly to the names, but perhaps to an even greater extent, the figures of the regnal lengths were prone to being affected by scribal errors. The evaluation of the figures of the kings of the Fifth Dynasty as transmitted by Africanus will require further research and detailed analysis of contemporaneous material and the Egyptian king-lists, in particular the Royal Canon of Turin, but this cannot be accomplished here.

2. Manetho and the Fifth Dynasty

The section of Eusebius⁶² text on the Fifth Dynasty is, unfortunately, substantially abbreviated⁶³ and was particularly prone to error, not to say corruption, as was already noticed by George Syncellus.⁶⁴ Eusebius gives a total of 31 kings for the Fifth Dynasty, which is an unexpectedly high number. But it is even more surprising that Eusebius mentions ὘θόνης, which is the (distorted) Greek rendering of the Egyptian name *Tj*,⁶⁵ as this dynasty's first king, and Φίοψ, which is the Greek rendering of the Egyptian name *Ppj*,⁶⁶ as this dynasty's fourth king. As becomes obvious, the Fifth Dynasty according to Eusebius must represent a combination of the historical Fifth and Sixth Dynasties.⁶⁷ This is furthermore supported by the *curiosum* that

⁶³ Instead of copying a great number of seemingly superfluous royal names, many of which were not connected with historical events in the *Epitome*, Eusebius mentions for the earlier part of Egyptian history (Third through Eleventh Dynasties) only those kings for whom he found glosses in his *Vorlage*; all other names were left out and considered as the names of kings who had left nothing worth mentioning in the written record; cf. the overview given by REDFORD 1986a, pp. 206-209 with the text according to Africanus (WADDELL 1942, pp. 30-65; JACOBY 1923-58, vol. IIIC, № 609 F2; WALLRAFF 2007, pp. 104-107; MOSSHAMMER 1984, pp. 64-65; ADLER AND TUFFIN 2002, pp. 81-82).

⁶⁵ *Tj* ~ **Táti(j)* > **Tötē* ~ **Θόθις* → ὘θόης → ὠθόης; cf. for contemporaneous attestations of this royal name the Pyramid Texts found in his pyramid (SETHE 1908-23, *passim*; cf. also VON BECKERATH 1999, pp. 62-63; cf. for the use of this hypocoristicum as the name of commoners RANKE 1935-52, vol. WEST 1973, p. 25; PÖHLMANN 1994, vol. II, pp. 43-46; cf. also KENYON 1899, table after p. 128 and n. 60 above); it is indispensable to consider the itacistic development of Hellenistic and Imperial Greek (THUMB, KIECKERS AND SCHERER 1932-59, vol. I, pp. 43-45, vol. II, pp. 306-313; HOFFMANN, DEBRUNNER AND SCHERER 1969; cf. also KRETSCHMER 1901; NIEHOFF-PANAGITIDIS 1994; BUBENÍK 2007), which forms the phonological basis for the misspelling *i* → *η* (MAYSER 1923-36, vol. I; MAYSER AND SCHMOLL 1970, vol. I.1; GIGNAC 1976, vol. I; TEODORSSON 1977). This interpretation is supported by the Armenian version according to Eusebius (AUCHER 1818, p. 208), which gives this royal name as Ոթինս *Or̄ios*; this is undoubtedly the result of an early emendation attempt in one branch of the Greek manuscript tradition, which judged **Θόθις* (← **Θόθις*) as a form with erroneously metathesised vowels and thus conjectured **Θοθης* → **Θθοης*, which is the exact *Vorlage* of Armenian Ոթինս *Or̄ios*. Currently, Armenuhi Drost-Abgarjan is preparing a new edition of the Armenian version of Eusebius based on formerly unknown manuscripts, which will improve the understanding of this branch of the tradition (cf. for the time being DROST-ABGARJAN 2016).

⁶⁶ *Ppj* ~ **Pāyāpāyā* > **Pāyāpyē* > **Pyōpyē* ~ *Φίος* (Pepy I) ~ *Φίωψ* (Pepy II); Cf. for contemporaneous attestations of this royal name the Pyramid Texts found in the pyramids of either king (SETHE 1908-23; cf. also VON BECKERATH 1999, pp. 62-63; cf. for the use of this hypocoristicum as the name of commoners RANKE 1935-52, vol. It is possible that *Φίος* (Pepy I), with loss of the second labial, and *Φίωψ* (Pepy II), with retention of the second labial, were used deliberately in order to avoid two identical names in the king-list at a short distance, which could have cast doubts about the reliability of the records.

⁶⁷ Thus already AUCHER 1818, pp. 208-209 n. 5; cf. WADDELL 1942, p. 51 n. 3.

Νίτωκρις (<*Nj.t-jkr:t*)⁶⁸ is the only sovereign of the Sixth Dynasty after Eusebius, which lasted, all together, merely three years;⁶⁹ however, another manuscript, which was available to George Syncellus and fits the Armenian version, gave 203 years,⁷⁰ which is in line with the Manethonian tradition according to Africanus.⁷¹ This confusion is difficult to explain, but, in Eusebius' text or perhaps already in his *Vorlage*, a ruling queen (Νίτωκρις) may have been perceived as so utterly exotic as to make her a dynasty of her own.⁷² As a result, the kings of the Sixth Dynasty before Νίτωκρις were added to the Fifth Dynasty. The final number of 31 kings nevertheless remains an enigma, since this is roughly twice the number expected (eight or nine kings for the Fifth Manethonian Dynasty, five or six kings – depending on whether queen Νίτωκρις was included or not – for the Sixth Manethonian Dynasty).⁷³ The situation in the king-list according to Pseudo-Apollodorus/Pseudo-Eratosthenes,⁷⁴ who often provides information in addition to Manetho, is of no help at all, because it does not preserve the names of any of the kings of the Fifth Dynasty. It is unclear how this might have happened, but one may speculate that, in a severe case of *aberratio oculi*, the compiler or a scribe jumped from Μεγχέρης (Mycerinus) to Μεγχέρης (Menkauhor) and left out everything in between. Be this as it may, the names of the kings of the Fifth Dynasty are actually preserved in the Manethonian tradition according to Africanus.⁷⁵

⁶⁸ According to the Greek form (WADDELL 1942, pp. 50-56; JACOBY 1923-58, vol. IIIC, № 609 F2-3; WALLRAFF 2007, pp. 104-107; MOSSHAMMER 1984, pp. 64-65; ADLER AND TUFFIN 2002, pp. 80-83), this name must be interpreted (FECHT 1960a, § 13 n. 36) as a substantival sentence #substantive – adjective# (cf. EDEL 1955-64, vol. II, § 948), which is known as an onomastic pattern at least from the Middle Kingdom onwards (cf. section 2.5); cf. for the alternative variant of that name, *Nj.t-jkr:tj*, the Royal Canon of Turin (GARDINER 1959, pl. II; cf. for the revised numbering of columns HELCK 1992; RYHOLT 2004; RYHOLT 2006), which leaves it undecided which form of this name should be considered the original one (cf. also VON BECKERATH 1999, pp. 62-63). Cf. for the disputed historicity of queen Nitocris RYHOLT 2000; CALLENDER 2011a, s.v. Neit-ikrety/Nitokris; CALLENDER 2011b.

⁷² The starting point of this confusion can be sought for in a summation line of the Fifth Dynasty which had been left out by mistake; cf. SCHOENE 1866-75, vol. I, col. 140 n. 4.

⁷³ It is thus most likely that the total gave 14 (8+6 or 9+5) kings, which, written with Greek numerals according to the alphabetic Alexandrian system (cf. TOD 1911/12; TOD 1913; DOW 1952; RICHARDSON 1977; IFRAH 1981, vol. I [in particular chapter 16]), would look like ιΔ' in ancient uncials (cf. the basic remarks in MAYSER 1923-36, pp. 52-53; LARFELD 1914, § 186-192; SCHUBART 1925, pp. 177-178; DEVELIN 1990; cf. also the pertinent passages and examples in HARRAUER 2010; SEIDER 1967-90; TURNER AND PARSONS 1987; CAVALLO AND MAEHLER 1987; CAVALLO AND MAEHLER 2008) and could, perhaps with intermediate steps (ιΔ' → ια' → αα'?), be misread as αα' (all this must have happened before the 4th century AD, when the Armenian translation was made, cf. DROST-ABGARJAN 2006, p. 256; GRUSKOVÁ 2013), which in at least some lines of tradition was rendered as τριάκοντα ἐνός (genitive) as is still found in the manuscripts.

^e A.B: Μεγχέρης.

^f B: Τανχέρης. A: Ταρχερής.

^g A: Ὄβνος.

^h the final summation is incorrect, read ἔτη σμη' (218 years).

At a glance, three peculiarities of Manetho's Fifth Dynasty become salient: first, the heading speaks of eight kings, but nine are mentioned; second, the kings are said to descend from Elephantine, which certainly is unhistorical, and third, the total is wrong by 30 years giving 248 (σμη') instead of 218 (σητ') years.

First, the divergent number of kings is either indicative of a severe mistake in copying or of some sort of broken up double entry, i.e., that originally a king was cited with two names, but later these were interpreted as two separate kings.⁷⁶ The third and fifth kings, Νεφερχέρης and Χέρης are likely candidates for this.

Second, the alleged origin of the Fifth Dynasty has already been explained by Jürgen von Beckerath.⁷⁷ According to him, *Elephantine* or *ȝbw*⁷⁸ is a misreading for *Śȝhw*,⁷⁹ which in Papyrus Westcar is explained as the hometown of the Fifth Dynasty.⁸⁰ It is most likely that this misattribution involved a manuscript with a partially damaged entry [Śȝh]bw, which subsequently was conjecturally restored to [ȝ]bw. It is unclear when this might have happened,

but this clearly occurred in the Egyptian tradition (perhaps its Demotic phase)⁸¹ before the data was obtained by a historian writing in Greek.

Third, the incorrect total of 248 (συη') years instead of 218 (σιη') years is perhaps a simple miscalculation, but the reason for this might be sought for in the history of tradition. It is tempting to view this as a mistake which points towards the confusion of the Fifth and Sixth Dynasties as it is found in the list of Eusebius,⁸² because a reign of 30 years – and thus exactly the difference – is ascribed to Ὁθόνης. One might thus surmise that king Teti was mentioned in both dynasties, the Fifth and the Sixth, and that Africanus deleted one of these doubles, only keeping the wrong total. However, there is no support for the theory that, in addition to the line of tradition to which Eusebius belongs, the list according to Africanus had also once mixed up the Fifth and Sixth Dynasties. It is also possible that this miscalculation is connected with the discrepancy in the number of kings, and one cannot rule out an arithmetical error by one of the scribes who checked the numbers and totals. Finally, one has to admit that the details are still uncertain and will require further research.

The first king of the Fifth Dynasty is *Wśr-k3=f*, whose name must be viewed as some kind of a short name⁸³ showing the suffix pronoun =f instead of a theonym,⁸⁴ perhaps *Rw*. In line with the principles of private names,⁸⁵ *Wśr-k3=f* ‘His ka is vigorous!’ should be analysed as an adjectival sentence⁸⁶ expressing a personal religious belief or a common religious statement.⁸⁷ Manetho’s Οὐσερχέρης, however, is not a satisfactory representation of *Wśr-k3=f* as it is found in Old Kingdom sources and the Abydos and Saqqarah king-lists. Closer examination reveals that *Wśr-k3=f*’s name must have undergone two modifications:

First, the suffix pronoun =f was replaced with the theonym *Rw*⁸⁸ resulting in *Wśr-k3-Rw* ‘Powerful is the ka of Re!’. The reason for this was the systematic alignment of superficially irregular names to the pattern of Middle and New Kingdom throne names,⁸⁹ which, following Johannes Buchberger,⁹⁰ consist of a noun phrase, in this instance a substantivised accusative of respect, and the theonym *Rw*. At the same time, the grammatical pattern of this name was re-

⁸⁴ Cf. the analogous instance of *Hntj-k3.w=f* ‘His kas are foremost!’ (REISNER 1942, pl. 30.b; SCHEELE-SCHWEITZER 2014, № 2799) and *Hntj-k3.w-Hrw* ‘The kas of Horus are foremost!’ (PM III, pp. 629-630; SCHEELE-SCHWEITZER 2014, № 2797); cf. also n. 216 below.

⁸⁵ It is important to note that, during the Fifth Dynasty, kings still did not obtain a throne name. The names written in cartouches are their personal names, of which nick names may be derived. Cf. GARDINER 1994, p. 494; SCHEELE-SCHWEITZER 2007, pp. 91-94; BARTA 1989, p. 7.

In Late Egyptian, the adjectival sentence had already become a rare archaising/classicising construction, cf. FECHT 1960a, § 245-253; GUNDACKER 2010, pp. 93, 101, 104-105; cf. also SETHE 1919, § 85-86.

interpreted without (much) impact on its pronunciation (adjectival sentence → substantival sentence with accusative of respect in first place).

Second, as a consequence of the grammatical interpretation proposed, *wśr* must be viewed as an adjective proper and, therefore, the *-r#* of *wśr* should not be preserved in Manetho's rendering.⁹¹ The unexpected re-occurrence of word-final *-r#* is, however, a common phenomenon and may be explained as the substitution of the bare adjective with a Demotic main clause *śdm=f* typical for adjective verbs.⁹²

In Papyrus Westcar, a totally different development may be discerned. *Wśr-r=f* is obviously a corrupt variant of king *Wśr-k3=f*'s name, yet it has not come into being by coincidence,⁹³ but is part of a folk-etymological approach⁹⁴ in order to re-interpret the names of the *dramatis personae* in such a manner that either their role becomes apparent or at least some vague allusions come to the audience's mind. Similar reshaping has affected the names of *Hj=f-Rw* → *Hw=f-Rw* and *Rw-b3=f* → *B3w=f-Rw*.⁹⁵ It is interesting to note that *Wśr-r=f* forms part of

⁹¹ Unambiguous examples of adjectival sentences are exceedingly rare, but cf. perhaps *Nfr-śn.nw* ~ **Nāfīr-śinnāw* > **Nēf-śnōw* ~ Νεφέσνοῦς ‘The second one is good!’ (cf. GUNN AND FIRTH 1926, vol. One should also remember the throne name of Ramesses II, *Wśr-m3.t-Rw* ~ **Wāšīr-mi3'āt-Rī'uw* ‘The one whose cosmic order is vigorous is Re!’, which was rendered as *Wa-aš-mu-a-ri/e-a* in Middle-Babylonian (EDEL 1994, vol. a play on words spoken by Isis⁹⁶ at the birth of Rudjdjedet's triplets: *jm=k wšr.w m h.t=š m rn=k pwjj nj Wšr-r=f* ‘You shall not be (so) vigorous in her womb in this your name “The one more vigorous than he”!’. Although it is unknown whom *=f* designates,⁹⁷ the audience will have felt that this means Cheops, which clearly plays with the prophecy of the rise of a new dynasty and may explain why Cheops felt so very much endangered. One may suppose that the element *k3* was perhaps lost by accident and that, in the tradition to which the stories of Papyrus Westcar belong, this child’s name actually was *Wšr-r-k3=f* ‘The one stronger than his (Cheops?) *ka*’. The re-interpretation of *wšr* as *wšr-r=* (perhaps starting with an unusually complemented spelling like *||←) was thus certainly promoted by motifs of the stories of Papyrus Westcar. Anyway, *Wšr-r=f* is more likely to be a distant echo of the royal name *Wšr-k3=f* in popular tradition than the adequate basis of onomastic analysis.

The development of this royal name, from the Old Kingdom down to Manetho, who rendered it with Greek characters and added the Greek nominative desinence *-ς*,⁹⁸ may thus be summarised as follows:⁹⁹

*Wšr-k3=f ~ *Wššr-kážšf > *Wššr-kážšf →*
*→ Wšr-k3-Rw ~ *Wššr-káž-Ríčā > *Wšš-kó’-Ríčē →*
*→ *Wěšrě-kó’-Ríčē > *Wěšrě-kě-Rě ~ *Wšr-kě-Rě ~ Οὐσερχέρης*

The second king of the Fifth Dynasty is commonly called *Ś3hw-Rw* ‘The one whom Re approaches’,¹⁰⁰ but this name should perhaps be interpreted differently. Keeping in mind that the concept of a throne name was still *in statu nascendi* during the Fifth Dynasty,¹⁰¹ it is necessary to assume a name fitting for a boy not destined for the Egyptian throne by birth. Among Egyptian names, there is a great number of sentences, not necessarily with reference to the child itself, which were spoken at the actual birth of the child.¹⁰² These include beseeching requests of the woman giving birth for a god’s aid, e.g., *Jwt-n=j-Pth* ‘May Ptah come to me!’,¹⁰³ and (*J*)*mj-n=j-Śbkw* ‘Come to me, Sobek!',¹⁰⁴ but also thankful exclamations after a god’s relieving intervention, e.g., *M3=j-śhm-Jnpw* ‘I have seen the power of Anubis!',¹⁰⁵ *Jjj-n=j-Hrw* ‘Horus has come to me!'¹⁰⁶ and *Rw-hr=j* ‘Re is with me!'.¹⁰⁷ The name of the second king of the Fifth Dynasty is best explained as a name spoken by the future king’s mother, *Ś3h-wj-Rw* ‘Re has come close to me!', which thus belongs to the group of grateful prayers.¹⁰⁸ The variant of Papyrus Westcar must be viewed as having been re-interpreted and perhaps intentionally

¹⁰⁰ E.g., VON BECKERATH 1999, pp. 56-57; somewhat differently DESSOUDEIX 2008, p. 76; His interpretation is nevertheless unconvincing because the supposed inversion of *agens* and *patiens* in order to get ‘celui qui Râ a doté’ is, in the light of Old Egyptian morphology, impossible since there is no active participle with the singular desinence -*w*, cf. EDEL 1955-64, vol. I, § 626-637; ALLEN 1984, § 600-643. Furthermore, the verb *ś3h* ‘to bestow, to donate’ is unattested before the Middle Kingdom (WB IV, p. 21 (15)-(20); HANNIG 2006a, p. 715; HANNIG 2003), and, moreover, there is not a single secure attestation of this verb in Egyptian personal names (cf. RANKE 1935-52; SCHEELE-SCHWEITZER 2014).

altered. At the moment of the child's birth, Isis¹⁰⁹ says *jm=k š3h.w m h.t=s m rn=k pwjj nj Š3h-Rw* ‘You shall not kick in her womb in this your name “Kicking toe of Re”!’, which is clearly another aetiological explanation of this name. There is an interesting etymological relationship between *š3h* ‘to come close’,¹¹⁰ which may go back to a more archaic meaning ‘to toe, to kick’, and *š3h* ‘toe’.¹¹¹ This may furthermore allude to the king as a member (the toe) of Re,¹¹² which was cleverly used in the framework of the story. Be that as it may, the name of *Š3h-wj-Rw* has been altered in the tradition of Papyrus Westcar and is, just like that of *Wšr-k3=f*, of limited value for an onomastic analysis.

According to the king-lists of Abydos and Saqqarah, there is good reason to assume a continuous and stable tradition for this royal name down to Manetho's text. Nevertheless, there is one inconsistency with Manetho's Σέφρης as the offspring of *Š3h-wj-Rw*, because, instead of -φ-, one would have expected -χ- and thus *Σέχρης.¹¹³ However, Greek papyri from Egypt often display an unpredictable interchange of the Greek characters θ, φ and χ, which, at least in part, still denoted Greek aspirates θ ~ /tʰ/, φ ~ /pʰ/ and χ ~ /kʰ/ (which later would develop to fricatives θ ~ /tʰ/ > /θ/, φ ~ /pʰ/ > /f/ and χ ~ /kʰ/ > /x/), but were already used to denote the Egyptian fricatives /f/ and /x/.¹¹⁴ Manetho's Σέφρης is thus an acceptable approximation of the name *Š3h-wj-Rw*. The development from the Old Kingdom form *Š3h-wj-Rw* to Manetho's Σέφρης may thus be summarised as follows:¹¹⁵

Š3h-wj-Rw ~ **Šā3hā-wij-Rī'ūw* > **Šā3hā-wi-Rī'ū* > **Šā3hā-wē-Rī'ā* >
> **Šē3h-ē-Rī'(ē)* > **Šē3h-Reē* ~ *Σέχρης ~ Σέφρης

The third king of the Fifth Dynasty is known as *Nfr-jrw-k3-Rw*, once more an adjectival sentence representing the declaration of a religious statement: ‘Perfect are the guise and *ka* of Re!'¹¹⁶ A hypocoristicum, which was derived from this name *via* the reduplication of one element and the addition of a hypocoristic ending,¹¹⁷ can be found in *K3k3j*.¹¹⁸ In the Old Kingdom, the full name *Nfr-jrw-k3-Rw* seems to have been preferred in official settings over the hypocoristicum *K3k3j*, which was mostly used for reasons of convenience or in order to express a particular personal relationship to the king.¹¹⁹ However, both names must have formed part of the historiographic tradition so that they were transmitted side by side as if they were the throne and birth name of that king. It is even likely that they were viewed as such from the Middle Kingdom or, at the latest, the New Kingdom onwards. Therefore, it is easy to

¹¹⁶ Cf. BARTA 1989, p. 7; SCHNEIDER 1996, p. 266; the translations of DESSOUDEIX 2008, p. 79 ‘Celui qui a fait le *ka* de Râ est parfait’ and of LEPROHON 2013, p. 39 ‘The perfect one is the one whom the *ka* of Re has engendered (lit. ‘made’)’ are semantically and grammatically highly problematic. However, further discussion of this cannot be provided here.

¹¹⁷ Cf. GUNDACKER 2013a, pp. 66, 70-71 and n. 83 above.

understand that the full name *Nfr-jrw-k3-Rw* can be found in the king-list of Saqqarah and the hypocoristicum *K3k3j* in the king-list of Abydos. As a consequence, one can conjecture king-lists written on papyrus which gave the throne name and the birth name for every king, though some scribes chose for different reasons one or the other name (e.g., in order to prevent homonymous kings in a list providing only one name for each king).¹²⁰

It comes as no surprise that, in Papyrus Westcar, where the new-born kings of the Fifth Dynasty are presented as the innocent and sympathetic antagonists of the embittered and tyrannical king Cheops, *Nfr-jrw-k3-Rw* is mentioned with the hypocoristicum *K3k3j*. Once again, the name is pronounced by Isis¹²¹ at the birth of the child and embedded in a play on words: *jm=k kkj.w m h.t=s m rn=k pwjj nj Kk(j)w* ‘You shall not be dark (i.e., blind) in her womb in this your name “Darkness (i.e., Blindness)”!’. Obviously, the hypocoristicum *K3k3j* has been re-etymologised and connected to *kk(j)w* ~ (1) **kākāw*, (2) **kūkjāw* ‘darkness’,¹²² but the version of Papyrus Westcar might itself be a mitigated variant of the story as Verena Lepper¹²³ convincingly argued. According to her, the verb *kkj* ‘to be dark’ takes the place of *k3k3* ‘to harm’,¹²⁴ which may have formed a *nomen agentis* *k3k3w* ~ **kākādāw* ‘harmer’ closely resembling the hypocoristicum *K3k3j* ~ **Kākādāj*.¹²⁵ Even though gravely influenced by folk-etymology and analogical reshaping, Papyrus Westcar proves to be an interesting and rewarding source of information although it can only supplement other material and heavily depends on careful examination itself.

Just as with the name of *Wśr-k3=f*, the name must also have been re-interpreted in the case of *Nfr-jrw-k3-Rw* after the model of Middle and New Kingdom throne names,¹²⁶ and, later, the bare adjective was perhaps replaced with a verbal form typical for Demotic adjective verbs.¹²⁷ The result of this is, again, the re-introduction of -r# of *nfr*, although, in this particular instance, the restored -r# was hidden behind the remains of the word *jrw* ‘guise’ in pretonic position.

¹²⁰ The treatment of *Pjj* I and II and *Nfr-jrw-k3-Rw* I and II in the king-lists of Abydos and of Saqqarah is an instructive example for this phenomenon. The king-list of Abydos mentions (36) *Mrjj-Rw* and (38) *Nfr-k3-Rw*, the king-list of Saqqarah (34) *Pjj* and (36) *Nfr-k3-Rw*; furthermore, one can find, in the king-list of Abydos, (28) *K3k3j* and (56) *Nfr-jrw-k3-Rw* and, in the king-list of Saqqarah, (27) *Nfr-jrw-k3-Rw*, but *Nfr-jrw-k3-Rw* II was left out (cf. n. 43-44 for bibliographical references). A similar observation for the Middle Kingdom in Manetho’s *Aegyptiaca* was proposed by FECHT 1960b, pp. 119-120.

¹²⁴ WILSON 1997b, p. 1083; if this suggestion is considered correct – and, in the light of derivations of this verb which are attested in medical literature of the New Kingdom (cf. WB V, pp. 86 (7), 109 (8)-(9)), there is good reason to do so –, the verbs *wśr* ‘to be vigorous’, *s3h* ‘to kick’ and *k3k3* ‘to harm’ would refer to the enormous divine power of the sons of Re which they could not control because of their young age, thereby exposing their mother to danger.

Νεφερχέρης is thus an excellent Greek rendering of this royal name, the development of which may be summarised as follows:¹²⁸

*Nfr-jrw-k3-Rw ~ *Näfr-jirāw-kā3-Rī'ūw > *Näfr'-jirā-kā3-Rī'ū >*

KLOTH 2002, pp. 15-16, 52, 86, 113, 129-133, 151-154, 157-159, 161-163, 237, 243, 247, 251, 258-260, 284-285; cf. also PM III, p. 464; MARIETTE 1889, pp. 112-113, 451-453; SETHE 1933, pp. 51 (11) – 53 (13); BAUD 1999a, vol. A Late Period scarab mentioning king Šps(s)-k3-Rw and usually attributed to this king (PETRIE 1889, pl. I; VERNER 2001, p. 396) should perhaps be viewed as an archaising object in honour of king Šps(s)-k3=f, whose name was altered to Šps(s)-k3-Rw by the time of the New Kingdom (cf. The fourth king of the Fifth Dynasty according to Manetho and the king-list of Saqqarah is the ephemeral king Šps(s)-k3-Rw, but Miroslav Verner¹²⁹ pointed out that this king is more likely the fifth king of the Fifth Dynasty. Be that as it may, Šps(s)-k3-Rw is certainly another instance of a

name expressing a religious statement,¹³⁰ ‘The *ka* of Re is noble!’, although this particular name might be a programmatic and specifically royal name. Peter Kaplony¹³¹ assumed that this king’s birth name was actually *Wśr-ntr=j* ~ **Wăšır-nătrij* ‘My god is vigorous!’.¹³² If so, this might be one of the earliest cases of a name change associated with the ascension to the throne and thus some kind of a prototype for throne names.¹³³ Anyway, the reading and interpretation of this name remain dubious¹³⁴ and it is only the name *Špss-k3-Rw*¹³⁵ which was passed down with historiographic materials.

Špss-k3-Rw was perhaps re-interpreted after the model of Middle and New Kingdom throne names.¹³⁶ It is unclear whether the replacement of the bare adjective with a Demotic main clause *šdm=f* typical for adjective verbs¹³⁷ also occurred in this instance, but this is at least possible. If so, *špss* ‘noble’ was perhaps also substituted or confused¹³⁸ with the more common *špj* ‘to be noble’.¹³⁹ It is, however, important to keep in mind an observation of Gerhard Fecht,¹⁴⁰ who discovered that unstressed vowels tend to develop to *-i-* in the neighbourhood of sibilants. Consequently, several variants could have existed, depending on whether the original predicative adjective had been replaced with a verbal form or not and whether this special sound shift had occurred or not. At any rate, the name of the fourth king of the Fifth Dynasty should have developed as follows:¹⁴¹

Špss-k3-Rw ~ **Šypsīš-kā3-Rī'uw* > **Šypsēš-kā3-Rī'u* >
 > **Šepšēš-kō3-Rī'ā* > **Šepšēš-kō3-Rī'ē* >
 > **Šepšēš-kē3-Rē'* ~ **Σεψεσχέρης* ~ **Šipsīš-kē3-Rē'* ~ **Σιψισχέρης* →
 → **Šepšē-kē3-Rē'* ~ **Σεψεχέρης* ~ **Šipši-kē3-Rē'* ~ **Σιψιχέρης* →
 → *Σισήρης*

¹³⁰ Cf. for this interpretation GRAEFE 1995, p. 124; GUNDACKER 2013a, pp. 39 n. 37, 46-47 n. 86, 65, 72, 81 n. 337, 91; cf. also RANKE 1935-52, vol. II, pp. 219-223.

¹³³ Yet the motif for the adoption of a new name remains uncertain; whether this has something to do with an increasing devotion to Re and the fact that no god was explicitly mentioned in *Wśr-ntr=j* ‘My god is vigorous!’? Or was it because, in this name, *ntr* designates the king?

¹³⁵ Miroslav Verner questions the reading *Špss-k3-Rw* on grounds of the variants *Špss-k3-Rw* and *Špj-k3-Rw* found on seal impressions (VERNER 2000b, p. 582). This variation is perhaps best explained as two different kinds of complementation (cf. EDEL 1955-64, vol. I, § 58-61; SCHWEITZER 2005, § 165-172) which would support a common reading *Špss-k3-Rw*.

After the suffix pronoun had been replaced with the theonym Re, the name of the last king of the Fourth Dynasty, Špss-k3=f, should have developed exactly like the name Špss-k3-Rw.¹⁴² But in either case, Manetho records unexpected, seriously garbled renderings: Σεβερχέρης¹⁴³ (Špss-k3-Rw ← Špss-k3=f), Σισίρης (Špss-k3-Rw). It would seem that these names, with a sequence of sibilants and high vowels, sounded so totally strange to Greeks that they simplified and altered them. Consequently, *Σεψεσχέρης/*Σεψεχέρης turned out as Σεβερχέρης, and *Σιψισχέρης/*Σιψιχέρης turned out as Σισίρης.¹⁴⁴

¹⁴⁴ FECHT 1960b, p. 119; GUNDACKER 2013a, pp. 92-93. It is possible that this royal name was folk-etymologically re-shaped under the influence of the theonym Osiris (cf. for Σίριος according to Pseudo-Apollodorus/Pseudo-Eratosthenes as a similar case GUNDACKER 2015a, p. 111 n. 120).

The fifth king of the Fifth Dynasty according to the king-list of Abydos is king *Rw-nfr=f*. Despite the fact that *Rw-nfr=f* and *Špsš-k3-Rw* may have switched positions in at least some king-lists,¹⁴⁵ the reading of this royal name is highly disputed. Already part of the discussion between Hermann Ranke¹⁴⁶ and Helmut Brunner¹⁴⁷ whether one should read *Rw-(j)dd=f* and *Rw-hcj=f* or *Ddj=f-Rw* and *Hcj=f-Rw*,¹⁴⁸ Miroslav Verner¹⁴⁹ presented a few seal impressions with the alternative spellings and respectively and proposed reading this royal name *Rw-nfr* ‘Re is a perfect one!’ (substantival sentence). To this interpretation, one might add a reading *Nfr-Rw* according to the very common name type *#nfr + theonym#*,¹⁵⁰ and, following Helmut Brunner,¹⁵¹ one might suggest *Nfr=f-Rw* ‘May he be perfect, (viz.) Re!’. However, the statement made by names such as *Nfr=f-Rw* ‘May he be perfect, (viz.) Re!’ and *Ddj=f-Rw* ‘May he endure, (viz.) Re!’ are pure nonsense: *nfr=f* ‘may he be perfect’ and *ddj=f* ‘may he endure’ cannot be applied to Re who already is perfect and everlasting. Names following the pattern *Rw-nfr* are exceedingly rare (or at least notoriously difficult to detect)¹⁵² and, judging from *Rw-wśr* found in the stories of Papyrus Westcar,¹⁵³ perhaps a pseudo-archaic innovation of the Middle Kingdom. Besides, *Nfr-Rw* is attested as a profane name all throughout the Old Kingdom,¹⁵⁴ but Katrin Scheele-Schweitzer¹⁵⁵ noted that, during the Old Kingdom, ordinary men were not allowed to bear a king’s full name after his enthronement. Consequently, *Nfr-Rw* cannot have been the name of the fifth king of the Fifth Dynasty since it is attested in the second half of the Fifth and the Sixth Dynasty as the personal name of at least two individuals. The remarkable seal impressions found by Miroslav Verner can, moreover, be explained differently. Since their number is rather limited, they may be attributed to a very small number of seals with erroneous inscriptions (in particular in the case of the rarest (ortho)graphic variant

(⌚⌚), which all may be connected to a single seal) or to seals with an uncommon, though valid (ortho)graphic alternative which follows a rather atypical pattern of complementation¹⁵⁶ in combination with a metathesis of the complement and the suffix pronoun. As a result, this royal name must be read *R^{w-nfr=f}* and must be analysed as ‘Re is (always) perfect!’.¹⁵⁷

The further tradition contains no trace of this king’s hypocoristicum *Jsj*, which might contain a hypocoristic preformative *#j-* (and, perhaps, a hypocoristic ending *-j#* which usually represents **-ij#*, but, according to the spelling conventions of the Old Kingdom, may also designate another hypocoristic ending which is usually spelled *-jj#* and stands for **-(ā)jjā#*)¹⁵⁸ attached to the noun *sj* ‘man’,¹⁵⁹ which indicates a reconstruction *Jsj ~ *Jāsījjā* meaning ‘little man’.¹⁶⁰ It is noteworthy that this hypocoristicum, with a single exception, is only attested for men.¹⁶¹ The exception mentioned¹⁶² either is derived from *sj.t* ‘woman’ with deletion of the feminine morpheme *-t#* or it was given to a girl in honour of her father or another man bearing this name. The same holds true for the closely related reduplicated hypocoristicum *Ssj* ‘little man’, which is also predominantly borne by men,¹⁶³ but also by one woman from the very end of the Old Kingdom or the Heracleopolitan Period.¹⁶⁴ The corresponding ordinary hypocoristicum for women was apparently *Js(j)tj* ‘little woman’ (attested twice),¹⁶⁵ which with certainty was derived from *sj.t* ‘woman’.¹⁶⁶ The hypocoristicum *Hmj* ‘little servant’, which is attested for men and women, is perhaps a mixture, on the one hand, of derivations from *hm* or *hm.t* ‘servant’¹⁶⁷ and names containing either of these¹⁶⁸ and, on the other hand, of derivations

from *hm.t* ‘woman, wife’,¹⁶⁹ which, according to the spelling, is attested in one particular case written with the hieroglyph ‘female genital’ (Gardiner N42).¹⁷⁰ This particular woman¹⁷¹ thus bore a name *Hmj* ‘little woman’ similar to German *Frauke* ‘Frauchen’ and *Wiebke* ‘Weibchen’. As it seems, male hypocoristica were only very exceptionally used for women, but the number of such cases seems to have increased from the late Old Kingdom onwards. Whatever the case, it is evident that the hypocoristicum *Jsj* was not derived from this king’s full name.¹⁷²

The attestations of this king’s full name *Rw-nfr=f* are rather difficult to judge, especially because *Rw-nfr=f* is only rarely attested since it is now missing in the Royal Canon of Turin, and the king-list of Saqqarah displays an obviously corrupted spelling *Hj-nfr-Rw*. Only the king-list of Abydos retains this name in its correct form as *Rw-nfr=f*. The version found in the king-list of Saqqarah, *Hj-nfr-Rw*, has long been identified as an erroneous mention¹⁷³ of *Rw-nfr=f* under the assumption of a scribal error. Yet such a mistake, which would involve the signs ‘horned viper’ (Gardiner I9) and ‘hill over which are the rays of the rising sun’ (Gardiner N27), is highly implausible since these signs are unambiguously discernible and distinguishable in hieratic from the Old Kingdom down to the Ramesside period.¹⁷⁴ In search for an alternative explanation, it is important to bear in mind *Rw-nfr=f*’s Horus name  *Hrw Nfr-hw* ‘Horus “The one whose appearance is perfect”.¹⁷⁵ The variant found in the king-list of Saqqarah,  *Hj-nfr-Rw* ‘The one whose perfection is splendid is Re!’ – or, should a particular kind of graphic inversion¹⁷⁶ have operated, *Nfr-hw-Rw* ‘The one whose splendour is perfect is Re!’ – is thus most likely the result of mixing up the Horus name *Nfr-hw* and the full name *Rw-nfr=f*. With the already met re-interpretation after the model of Middle and New Kingdom throne names¹⁷⁷ and the substitution of a plain predicative adjective with a Demotic main clause *sdm=f* typical for adjective verbs,¹⁷⁸ one would expect *Nfr-hw-Rw* to end up in Greek exactly as **Νεφερχέρης* which thus should be found in Manetho’s account. Wolfgang Helck and Gerhard Fecht¹⁷⁹ convincingly demonstrated that Manetho avoided homonymous kings, especially in immediate sequence, and that he was inclined to delete kings who he thought were nothing but erroneous duplicates. It is thus plausible that Manetho found two kings whose

This hieroglyph is usually subsumed under the sign ‘well full of water’ (Gardiner N41) (cf. GARDINER 1957, pp. 456, 492), with which, no doubt, it merged early, but, originally, the ‘female genital’ (Gardiner D42) displayed a horizontal line on top, while the ‘well full of water’ (Gardiner D41) displayed a zigzag line on top.

names were rendered as Νεφερχέρης in Greek; the second of these, the equivalent of *Nfr-hrw-Rw-nfr=f*, contained a rare and unusual element *hrw* instead of the more common *k3* found in so many other names. Hence this name is a likely candidate for an early Pre-Old-Coptic gloss (either with Greek or, less probably, Demotic characters) indicating the pronunciation of this name.¹⁸⁰ Manetho perhaps misunderstood this supra-linear gloss *Χέρη as an alternative name, which, after furnishing it with the Greek nominative desinence -ς, he assigned as a second name to this king.¹⁸¹ It thus becomes feasible to reconstruct Manetho's king-list for this section of the Fifth Dynasty, which must have looked as follows when compared to his *Vorlage*:

| Manetho's <i>Aegyptiaca</i> | Manetho's immediate <i>Vorlage</i> |
|-----------------------------|---|
| Οὐσερχέρης | <i>Wsr-k3-Rw</i> (← <i>Wsr-k3=f</i>) |
| *Σέχρης | <i>Śjh-wj-Rw</i> |
| *Νεφερχέρης | <i>Nfr-jrw-k3-Rw</i> |
| *Νεφερχέρης ἢ Χέρης | <i>Nfr-hrw-Rw-Xérē</i> (← <i>Hrw Nfr-hrw x Rw-nfr=f</i>) |
| *Σιψιχέρης | <i>Śpsś-k3-Rw</i> |
| *Παούοσρις | <i>Nj-Rw-wsrw</i> (← <i>Nj-Rw-wsr</i>) |
| ... | ... |

According to this scenario, either Manetho himself in a redactional or editorial phase or the epitomiser of Manetho's *Aegyptiaca* must have judged *Νεφερχέρης and *Νεφερχέρης ἢ Χέρης as one and the same king and deleted the supposed duplicate *Νεφερχέρης thus uniting these two kings in a single entry *Νεφερχέρης ἢ Χέρης 'Νεφερχέρης or Χέρης'. This must have been the state of affairs when the *Epitome* was compiled and resulted in δυναστεία βασιλέων η' 'a dynasty of eight kings'. Perhaps in the course of handing down the *Epitome*, the double entry *Νεφερχέρης ἢ Χέρης was dissolved into two separate ones, which finds additional support in the identical figures (20 years) provided for both of them, Νεφερχέρης and Χέρης. One of the strategies to make two kings in sequence with identical numbers of regnal years more credible is to relocate one of them in the king-list. And this is exactly what must have happened to Χέρης, which therefore changed places with Σισίρης; it is furthermore remarkable that Manetho's *Vorlage* apparently conforms with Miroslav Verner's¹⁸² conclusion that *Śpsś-k3-Rw* succeeded *Rw-nfr=f*.¹⁸³ Although Χέρης is thus only a very faint trace of the historical *Rw-*

¹⁸² VERNER 2001, pp. 400-401; VERNER 2000b; cf. VON BECKERATH 1982; cf. also section 2.4 above.

¹⁸³ Alternatively, one could suggest that, initially, before *Νεφερχέρης and *Νεφερχέρης ἢ Χέρης were united in a single entry *Νεφερχέρης ἢ Χέρης, Manetho's Fifth Dynasty displayed the following sequence of kings: ... *Νεφερχέρης – *Σιψιχέρης – *Νεφερχέρης ἢ Χέρης ... Although this scenario would accord with the sequence of kings found in the king-list of Saqqarah and the Royal Canon of Turin, this would make it more difficult to argue the deletion of one king *Νεφερχέρης because of the intervening name *Σιψιχέρης, which would have reduced the impression of erroneous duplicates and thus the pressure to remove the second *Νεφερχέρης, especially since this one was differentiated by a second name (*Νεφερχέρης ἢ Χέρης). It is thus noteworthy that Manetho's text reflects the historical sequence of kings more closely than the Royal Canon of Turin and the Saqqarah king-list. Manetho's sources thus either belonged to a different line of tradition or the correct sequence of kings arose from yet another mistake which accidentally corrected an even earlier one.

nfr=f, the history of tradition of the *Aegyptiaca* adds important information to the current interpretation of the history of the Fifth Dynasty.

Finally, the development of the royal name *Rw-nfr=f* from the Old Kingdom down to the *Aegyptiaca* of Manetho can be summarised as follows:¹⁸⁴

Rw-nfr=f ~ **R̄t̄uw-nāṣārāf x ḥrw nfr-h̄w* ~ **ḥārūw Nāfr-h̄t̄āw* →
→ *Nfr-h̄w-R̄w* ~ **Nāf-h̄t̄ā-R̄t̄ā* > **Nāf-h̄t̄ā-R̄t̄ē* > **Nēf-h̄ēt̄-R̄t̄ē* →
→ **Nēfre-h̄ēt̄-R̄t̄ē* > **Nēfr-h̄ē-R̄ēt̄* ~ **Nēφερχέρης* → Χέρης

The sixth king of the Fifth Dynasty, whose name is usually interpreted as *Nj-wśr-R^cw* ‘The strength belongs to Re!’,¹⁸⁵ is another example of a name declaring a religious statement. However, this commonly accepted form, *Nj-wśr-R^cw*, is an obvious misreading if this name is analysed as an adjectival sentence with a de-prepositional *nisba* adjective as its predicate. Only should this name be interpreted as a syntagma, can the traditional reading *Nj-wśr-R^cw* ‘The one who belongs to the strength of Re!’¹⁸⁶ be kept. At first sight, there is no way to differentiate between names of these two kinds, but this only holds true if exclusively the names borne by men are evaluated. As soon as the names of women are analysed, it becomes obvious that there are numerous examples of adjectival sentences with the unmarked (superficially masculine) *nisba* adjective as predicate, e.g., *Nj-Hw.t-Hrw-k3.w* ‘The *kas* belong to Hathor!’,¹⁸⁷ but where a syntagma was chosen to form a woman’s name, the *nisba* adjective must display the feminine ending *-t#*. Names of this kind are, however, exceedingly rare – there are only two secure attestations: *Nj.t-Hw.t-Hrw* ‘The one (f.) who belongs to Hathor!’¹⁸⁸ and *Nj.t-šjj.t* ‘The one (f.) who belongs to the majestic eminence!’,¹⁸⁹ –, and both of them consist of only two elements. It is thus doubtful whether there ever existed tripartite names of this kind, which *per analogiam* also applies to the names of men. As a result, the name of the sixth king of the Fifth Dynasty should be judged as *Nj-R^cw-wśr* ‘The strength belongs to Re!’, a name consisting of an adjectival sentence.

The evaluation of this kind of name is particularly controversial, and the difficulties are summarised under the well-known label ‘the Λαμάρης-problem’,¹⁹⁰ which, above all, affects *Nj-R^cw-wśr* > Παθούρης and *Nj-m3^c.t-R^cw* > Λαμάρης, the throne name of Amenemhat III.¹⁹¹ Following the remarkable analysis of Johannes Buchberger,¹⁹² these names belong to two different sub-patterns of a common grammatical scheme: *Nj-R^cw-wśr* (perhaps subsequent to the re-interpretation after the model of Middle and New Kingdom throne names) was understood as a substantival sentence with an ordinary *nisba* adjective¹⁹³ ‘What belongs to Re is power!’, but *Nj-m3^c.t-R^cw* was from the very beginning of its existence a substantival

sentence with a reverse *nisba* adjective¹⁹⁴ ‘To whom the cosmic order belongs is Re!’. To date, this is the only explanation which does account for the different development of the *nisba* adjectives in these two names and allows for a consistent evaluation and categorisation of all remnants of the ordinary *nisba nj* (> Ø in pretonic position) and the reverse *nisba nj* (> *#lā- in pretonic position) known from Greek renderings of Egyptian personal names and Coptic compound nouns.¹⁹⁵ The word order expected according to this explanation is also in full agreement with the syntax of *nisba* adjectives; this was examined by Helmut Satzinger, Karl Jansen-Winkel and Hanna Jenni¹⁹⁶ who all concluded that prepositional *nisba* adjectives are immediately followed by their complement if the complement and an additional element, e.g., the subject in an adjectival or substantival sentence, belong to the same category of words, i.e., as long as both of them are either personal pronouns or substantives.¹⁹⁷ As a result, for grammatical reasons one ought to read *Nj-Rw-wśr*, which furthermore perfectly fits the form transmitted by Manetho (Παθούρης) with the theonym *Rw* preceding *wśr*. Exactly this sequence must reflect the original word order since there were numerous throne names which ended with the theonym *Rw* and which thus could have caused the analogical alignment of names like *Nj-Rw-wśr* displaying a differing word order. But a process which would have caused a highly artificial differentiation of a name in full accord with the unmarked word order of royal names (throne names) would be utterly surprising.

According to the unexpected re-occurrence of the -r# of *wśr*, the abstract noun *wśr* ‘strength’ must have been replaced at some point, perhaps during the New Kingdom or the Late Period, with a then better known and synonymous equivalent *wśrw* ‘strength’. A similar process is found with the toponym Memphis, *Mn-nfr* ~ **Mín-nášar* > **Mémfē* ~ Μέμφις¹⁹⁸ → *Mn-nfrw*

¹⁹⁵ Cf. the collection of attestations in BUCHBERGER 1933, pp. 621-631. It is interesting to note that Amenemhet IV chose a throne name which followed the same grammatical pattern as that of Amenemhet III, his predecessor. Even though most attestations of this throne name are perceived as *M³-ḥrw-Rw* ‘Re is triumphant’ or ‘Re is the triumphator’, a few instances clearly support the reading *Nj-m³-ḥrw-Rw* ‘To whom the triumph belongs is Re’. Unfortunately, it remains unknown whether this must be viewed as a matter of writing conventions with the *nisba* mostly spelled defectively, whether this means that there were two variants conveying practically the same meaning or whether Amenemhet IV bore two distinct, though superficially similar throne names. Cf. CARNARVON AND CARTER 1912, pl. 49; VON BECKERATH 1999, pp. 86-87; BUCHBERGER 1993, p. 620.

¹⁹⁷ In this respect, *nisba* adjectives which are employed as predicates in adjectival sentences behave syntactically like verbs. Cf. for Old Egyptian EDEL 1955-64, vol. I, § 363-368, 633, 644, vol. II, § 944, 946, 949, 951; SCHWEITZER 2005, § 453. Recently, James P. Allen suggested to analyse all sentences which display initial de-prepositional *nisba* adjectives as their predicates as substantival sentences (ALLEN 2017, pp. 91-92; cf. already EDEL 1955-64, vol. II, Nachtrag zu § 366). However, this is implausible given that the predicative *nisba* adjective is indeclinable for gender and number as one expects in the adjectival sentence (cf. the material collected in SCHEELE-SCHWEITZER 2014 and section 2.6 above; cf. for the in part difficult differentiation between verbs and adjectives PEUST 2008).

~ **Měn-náfrūw* > **Měn-nófrě* ~ (*)Mένοφρις¹⁹⁹ ‘The perfection (of Pepy I) remains!’, and the theonym Onnophris, *Wn-nfr* ~ **Wīn-náfär* > **Wm̄fē* ~ Ὄμφις²⁰⁰ → *Wnn-nfrw* ~ **Wānīn-náfrūw* > **Wēn-nófré* ~ Ὄννωφρις²⁰¹ ‘The one whose perfection exists’. However, Manetho’s form must furthermore have suffered from the confusion of circular Greek characters and the regrouping of a phonologically uncommon sequence (*-ογοc- → *-εογc- → *-εογ-),²⁰² which is frequently found in papyri.²⁰³ Finally, the desinence of Manetho’s rendering of *Nj-Rw-wśr*, which was the only royal name in Manetho’s Fifth Dynasty ending in *-ρις (~ *-rē+s) as opposed to seven (eight) instances of *-ρης (~ *-rē+s), was harmonised with the majority of instances; this kind of harmonising simplification was furthermore promoted by the itacistic homophony of -ι- and -η-.²⁰⁴

The development and tradition of the royal name *Nj-Rw-wśr* from the Old Kingdom down to the *Aegyptiaca* of Manetho can be summarised as follows:²⁰⁵

Nj-Rw-wśr ~ *Nj-Rīw-wāšār

Alternatively, this name is often identified with a king of the early Nineteenth Dynasty, i.e., *Mn-phtj-Rw*, the throne name of Ramesses I. (cf. LEPSIUS 1858, vol. I, pp. 123-124; STRUVE 1929; KRAUSS 1978, pp. 268-273; POPKO AND RÜCKER 2011, pp. 48-49). However, one has to concede that there has not been sufficient research (cf. ROME 1931 [in particular pp. 290-291 with n. 1]) on the ‘Era of Menophris’ (τὰ ἀπὸ Μενόφρεως) as mentioned in Byzantine manuscripts (cf. DEPUYDT 1995, pp. 46-47), which, above all, is known from a remark (BIOT 1823, pp. 303-309) accidentally transmitted together with the commentary of Theon of Alexandria (TIHON 1978; TIHON 1985) on one of Claudius Ptolemy’s minor works, Πρόγειροι κανόνες (HEIBERG 1907, pp. 159-185).

This process of reshaping was perhaps initiated by the tradition of Papyrus Westcar. Gerhard Fecht²⁰⁶ assumed that the name of *Rw-wśr*, the alleged high-priest of *Śḥbw*,²⁰⁷ impacted on that of *Nj-Rw-wśr*. Starting out as a nominal sentence *Rw-wśr* ~ **Rtūw-wāšir* ‘Re is a powerful one!’²⁰⁸ in the Middle Kingdom, when the subject and motifs of the stories of Papyrus Westcar evolved, this name was secondarily re-interpreted as an adverbial sentence containing a pseudoparticiple, *Rw-wśr* ~ **Rtūw-wāšir* → *Rw-wśr:w* ~ **Rtūw-wāšrāw* > **Rē-wāšrē* > **Rā-wōšrē* ~ **Paoúoσpiç*.²⁰⁹ As a consequence, the latest appearance of *Rw-wśr*’s name became homophonous with *Nj-Rw-wśr*’s name. There are thus two significant meeting points, which Papyrus Westcar and Manetho’s Fifth Dynasty share: first, the dynasty’s descent from *Śḥbw* (misread as *ȝbw* ~ Elephantine sometime before Manetho) and, second, the name of *Rw-wśr*, which due to accidental homophony was in danger of being mixed up with *Nj-Rw-wśr*.

The hypocoristicum *Jnj(j)* is perhaps nothing but the initial *nisba* adjective of the full name *Nj-Rw-wśr*²¹⁰ expanded with the hypocoristic ending *-jj#* ~ *-(ă)jjă#, which in the Old Kingdom could also be spelled *-j#*.²¹¹ Initial *#j-* could either represent the onset of the *nisba* adjective in its oldest form,²¹² or it may be a hypocoristic preformative found with many other names.²¹³ According to Gerhard Fecht and Jürgen Osing,²¹⁴ the *nisba* adjective *jnj* was vocalised **jānij* so that the hypocoristicum may be reconstructed as *Jnj(j)* ~ **Jānijă*.

The seventh king of the Fifth Dynasty is *Mn-k3.w-Hrw*, which once more is a name expressing a religious statement: 'The *kas* of Horus remain!'. Indeed this name is a good example for a special name pattern which is found several times among the members of the royal family during the second half of the Fifth Dynasty.²¹⁵ Manetho's rendering of this name reveals that, at some point in the ancient Egyptian tradition (perhaps during the New Kingdom or even later), the theonym *Hrw* was substituted with *Rw*.²¹⁶ *Mn-k3.w-Hrw* was thus re-interpreted after the model of Middle and New Kingdom throne names²¹⁷ and had become a look-alike of *Mn-k3.w-*

²¹⁵ Cf., e.g., the names of the princes *Hntj-k3.w-Hrw* 'The kas of Horus are foremost!' and *Nsr-k3.w-Hrw* 'The kas of Horus are [unknown word]!' (VERNER 1995, p. 66; VERNER AND CALLENDER 2002, pp. 55-61; VERNER 2014, p. 76; SCHEELE-SCHWEITZER 2014, № 2133, 2797). It is remarkable that Menkauhor's name as well as the names of the two aforementioned princes contain the theonym Horus. As it seems, during the late Fifth Dynasty, this deity attained supreme significance for the royal family, at least on a par with Re. Even though the epithet *s3-Rw* 'son of Re' (cf. section 2.9 and n. 242 below) remained in use, the specific tradition of the Fifth Dynasty to erect sun temples stopped with Menkauhor whose temple perhaps has never been completed. And even though Djedkare (cf. section 2.8 below) and Weserkare (*W3r-k3-Rw*), the somewhat enigmatic second king of the Sixth Dynasty (BAUD 2006, p. 146; cf. also BOLSHAKOV 2003; AFIFI 2011; MYSŁIWIEC 2011; THEIS 2015b), bore names referring to Re, neither Unas nor Teti used a name containing the theonym Re (cf. for this kind of name n. 84 above), and Pepy I started his reign with a programmatic name referring to Horus, *Nfr-s3-Hrw* 'The protection of Horus is perfect!', which, perhaps after the harim conspiracy (cf. KANAWATI 2003; KÖTHEN-WELPOT 2006; cf. also CALLENDER 2011a, pp. 214-216, 232-234, 249-271), was replaced with a new name focusing on Re (*Mrjj-Rw* 'Favourite of Re'; cf. GUNDACKER 2016b, p. 238). At the same time, however, the Pyramid Texts of Unas, Teti and Pepy I do mention Horus and Re side by side, which is strong evidence against some kind of religious conflict although a shift of focus is undeniable.

R^cw (Fourth Dynasty),²¹⁸ whom Manetho calls Μεγχέρης.²¹⁹ Approximately at the same time, the phonological reduction of pretonic *-k³.w-* must have progressed so far that it gradually became homophonous with the pretonic singular *-k³-*.²²⁰ Exactly this kind of confusion is attested in the Royal Canon of Turin and the king-list of Saqqarah.

Whether the bare initial adjective was, in this instance, replaced with a Demotic main clause *sdm=f* typical for adjective verbs²²¹ or not, Μεγχέρης as the Greek rendering of *Mn-k³.w-Hrw* → *Mn-k³.w-R^cw* is exactly the same as found with *Mn-k³.w-R^cw*, which thus is a fairly good rendering of what Manetho found in his sources. To sum up, the name of the seventh king of the Fifth Dynasty should have developed as follows:²²²

Mn-k³.w-Hrw ~ **Mīn-kāšāw-Háriūw* →
→ *Mn-k³.w-R^cw* ~ **Mīn-kāšā-Rīčā* > **Mēn-kāš-Rīčē* >
> **Mēn-kē-Rēč* ~ Μεγχέρης (manuscripts: Μενχέρης)²²³

Moreover, the full name *Mn-k³.w-Hrw* served as the starting point for the short name *Jk³.w-Hrw*,²²⁴ which, again, may display the hypocoristic preformativ *#j-*.²²⁵ Alternatively, though less plausibly, *jk³.w* might represent a *plene* written plural form which follows a rare morphological pattern.²²⁶ Accidentally, this kind of plural formation, *-jk³.w* ~ **-jākāšāw* > -ιέχως, is

Due to the homonymy of *Mn-k³.w-Hrw* and *Mn-k³.w-R^cw* during the Late Period, it is impossible to judge whether all attestations of the name *Mn-k³.w-R^cw* really belong to the famous king of the Fourth Dynasty. At least for those attestations which have ties to Gizah (WILDUNG 1968, pp. 222-224), the king of the Fifth Dynasty can be excluded.

²²⁸ EDEL 1960, pp. 79-80. Katrin Scheele-Schweitzer’s differentiation between the full name *Jjj-k3.w* ‘The kas have come!’ and the hypocoristicum *Jkw* is thus in part doubtful, because the short name *Jk3.w* ‘The kas’ can be graphically identical with *Jjj-k3.w* and *Jkw* (cf. SCHEELE-SCHWEITZER 2014, № 536).

The eighth king of the Fifth Dynasty is *Ddj-k3-R^cw*, which, again, is a name expressing a religious statement: ‘The *ka* of Re is enduring!’. In the king-list of Saqqarah, this has been misspelled and the ‘column imitating a bundle of stalks tied together’ (Gardiner R11) was replaced with a ‘feather’ (Gardiner H6) due to confusion of these two hieroglyphs. The Royal Canon of Turin shows another unexpected variant, which hints at a modernised spelling (柱状物) with two ‘columns imitating a bundle of stalks tied together’ (Gardiner R11), which finds a close parallel in the spellings of the royal name *R^cw-jdd=f* (king-list of Abydos 22: (柱状物), king-list of Saqqarah 18: (柱状物)).²²⁹ For an unknown reason, this modernised New Kingdom spelling was abridged, be it that the *Vorlage* was damaged and the two ‘columns imitating a bundle of stalks tied together’ (Gardiner R11) were all which remained legible, or be it that **Ddj* had become a new hypocoristicum, maybe under the influence of the stories of Papyrus Westcar, in which the magician (柱状物) *Ddj* is one of the most important *dramatis personae*.²³⁰ Whatever the case, Manetho must have encountered an undistorted example, since his rendering, Ταγχέρης, contains all three elements of the original name which was also re-interpreted after the model of Middle and New Kingdom throne names²³¹ and the initial adjective of which was perhaps also replaced with a Demotic main clause *śdm=f* typical for adjective verbs.²³² The transcription of the initial adjective (or main clause *śdm=f*) does not look like what one would expect. Instead of estimated *Τατιχέρης, the manuscripts provide Ταμχέρης (i.e., Ταγχέρης),²³³ which suffered from a misreading *-TI- → *-M-,²³⁴ but the consonantal cluster *-μχ- was certainly phonologically unstable. Therefore, *-μχ- was assimilated to *-vχ-, which perhaps was furthermore promoted by the similarity of -μ- and -v- in certain medieval bookhands (especially the so-called *Fettaugenschrift* of the Palaeologan era).

Ddj-k3-R^cw’s name is thus particularly well-suited to serve as a model for tracing the complex history of an ancient Egyptian royal name, which may be summarised as follows:²³⁵

Ddj-k3-R^cw ~ **Dădjī-kă3-Rītūw* > **Dădī-kă3-Rītū* >
 > **Dădē-kō3-Rītā* > **Dădē-kō3-Rītē* →
 → **Dădjē-kō3-Rīt* > **Dădī-kē3-Rē* ~ *Τατιχέρης →
 → *Ταμχέρης > Ταγχέρης (manuscripts: Τανχέρης)

The hypocoristicum *Jssj*,²³⁶ is evidently not derived from the full name *Ddj-k3-Rw*, and its meaning – if it was not a nursery word or a *Lallname* after all – remains uncertain, though it may be a reduplicated²³⁷ variant of Renerefef's hypocoristicum *Jsj* ‘little man’.²³⁸ Fortunately, there are two more royal names of the same kind, which are *Jtj* ~ **Jātātij* > Ἀθωθις (First Dynasty)²³⁹ and *Jppj* ~ **Jāpāpīj* > Ἀφωφις (Fifteenth Dynasty).²⁴⁰ From this evidence, *Jssj*, which belongs to a widespread pattern of hypocoristica, can be conjectured as *Jssj* ~ **Jāsāsīj*.

The ninth king of the Fifth Dynasty bore only one name which was enclosed in a cartouche. This name, *Wnjs*, is found with either *njswt-bjt* ‘king of Upper and Lower Egypt’²⁴¹ and also *s3-Rw* ‘son of Re’.²⁴² The meaning of this royal name is difficult to discern, though Katrin Scheele-Schweitzer²⁴³ was able to substantiate a previous suggestion²⁴⁴ that *Wnjs* is a hypocoristicum.²⁴⁵ It is nevertheless uncertain where the origins of the hypocoristic ending -js# should be sought for, but one may cite names like Jrjs²⁴⁶ and Rhjs,²⁴⁷ which certainly contain words or parts of words ultimately related to the verbs *jrij* ‘to do, to make’²⁴⁸ and *rjh* ‘to know’²⁴⁹ respectively. One may thus surmise that these hypocoristica are derived from full names containing a member of either word family and the dependent pronoun *sw* or *sj*. Such full names are, however, exceedingly rare, and no full name which belongs to this name pattern is attested with a member of the word family of the verb *rjh* ‘to know’. Besides, from Old Kingdom sources, only a single full name which contains a member of the word family of the verb *rjh* ‘to know’ is known, i.e., Rh.t-Rw ‘The one whom Re knows’.²⁵⁰ But there are at least two names containing a member of the word family of the verb *jrij* ‘to do, to make’ which belong to the name pattern mentioned: K3=j-jrj-sw ‘The one who made him is my

²⁴² The epithet *s3-Rw* ‘son of Re’ is, together with the royal name, enclosed in the cartouche; cf., e.g., LABROUSSE, LAUER AND LECLANT 1997, fig. 15, №. 11; PM III, pp. 420-421; cf. for this title JACOBSON 1939; BARTA 1975, pp. 19-43; VON BECKERATH 1999, pp. 25-26; WINDUS-STAGINSKY 2006, pp. 244-245.

²⁴⁵ However, this need not imply that *Wnjs* bore a full name hitherto unattested, because some frequent hypocoristica developed to and were used as full names in their own right.

*ka!*²⁵¹ and  *Jrj.j=j-św-sj* ‘The one whom I made is a man!’.²⁵² Names like *K3=j-jrj-św* ‘The one who made him is my *ka*!’ comprise a participial syntagma *jrj-św*, which after the model of  *Rīw-mśj-św mrjj-Jmnw ~ *Rītūw-măšij-śuw mărjāj-Jāmānāw > *Rītā-măšé-śa măy-’āmānā ~ Ri/e-a-ma-še-śa ma-a-i a-ma-na* “‘The one who begot him is Re’ whom Amun loves”,²⁵³ can be reconstructed as *jrj-św ~ *järīj-śuw > *järī-śuw (> *järē-śa)*. By accident, this particular hypocoristicum is not yet attested in Old Kingdom sources, but it is part of the onomastic corpus of the Middle and New Kingdoms.²⁵⁴ This kind of participial syntagma cannot explain the origins of the hypocoristic ending *-js#*, which must be viewed as **-jvč#*. It is therefore necessary to look for an alternative name pattern which may have served as the starting point of this unusual hypocoristic ending, and this name pattern may be found with names like *Jrj.j=j-św-sj* ‘The one whom I made is a man!’. It is, however, important to note that, already during the Old Kingdom, names of this pattern, i.e., substantival sentences containing the only rarely attested alternative copula *św* instead of the standard copula *pw*,²⁵⁵ were regarded as highly archaic and uncommon. The syllable structure and vocalisation of *Jrj.j=j-św-sj* can be conjectured as **Järjājīj-śuw-sj*,²⁵⁶ which would allow for the formation of short names like  *Jrj.j=j-św ~ *Järjājīj-śuw > Järjājī-ś*. Due to the exceptional grammatical pattern of short names like these, they are expected to undergo a process of morphological re-segmentation and re-analysis, e.g., **Järjājī-ś → *Järjā-jiś*. As a result, **-jiś* may have been re-interpreted as a hypocoristic ending and employed for the creation of further hypocoristica. Even though this hypothesis cannot be proved and the origins of the hypocoristic ending *-js#* remain rather enigmatic, its existence must be accepted as a fact. Be this as it may, the name of king *Wnjś* certainly belongs to the group of hypocoristica with the ending *-js# ~ *-jiś#*, and the core of the royal name *Wnjś* possibly belongs to the word family of the verb *wnn*

The vowel of the relative form’s desinence can be conjectured as **-ă-* based on the assumption that it must have been different from the vowel **-ū-* of the desinence of passive participles and that, because of the constant spelling *-w#* with all verbs with the exception of *verba ultimae infirmae*, which sometimes display an assimilatory variant *-j#*, it cannot have been **-i-* (cf. SCHENKEL 1983, pp. 186-188; SCHENKEL 2008, pp. 153-170; cf. ALLEN 1984, § 600-643; cf. EDEL 1955-64, vol. I, § 626-678). The reconstruction of *sj* ‘man’ as **sij* is based on the assumption that this word, because of its homophony with *s3 ~ *sī3* ‘son’ (cf. FECHT 1960a, § 169; OSING 1976b, vol. II, pp. 408 n. 90, 460 n. 114), became more and more infrequent from the Middle Kingdom onwards after the common sound change *3 ~ /R/ or /l/ > /'* (RÖSSLER 1971; SATZINGER 1994; SCHENKEL 2012, p. 53; KAMMERZELL 1997, pp. XLVII-L; PEUST 1999, pp. 127-131).

'to be, to exist',²⁵⁷ as was already pointed out by Gerhard Fecht.²⁵⁸ Presumably, *Wnjš* bore no full name from which this hypocoristicum might have been derived, because, sometime earlier, it had become an acceptable full name of its own. Initially, however, this hypocoristicum may have been derived from names like *Wn-nfr* 'The one whose perfection exists'²⁵⁹ with an active perfective participle *wn* ~ **w̄in* 'existing'²⁶⁰ as its predicate. Furthermore, this analysis contradicts a suggestion of Frank Kammerzell²⁶¹ who assumed that this name should be segmented *Wn-jš* ~ **Wān-jāš* and, in a play on words alluding to the Cannibal Hymn, should be translated 'Like a devourer'. With regard to this analysis, there are at least two problems: first, the verb 'to eat'²⁶² cannot be read *wn*, but only *wnm* as demonstrated by Wolfgang Schenkel;²⁶³ and second, a name such as 'Like a devourer' appears unequivocally unfitting in the setting of the Cannibal Hymn for reasons of piety and theology. To conclude, *Wnjš* should be viewed as a hypocoristicum consisting of the active perfective participle *wn* ~ **w̄in* 'existing'²⁶⁴ and the hypocoristic ending *-jš#* ~ **-j̄š#*. Accordingly, Manetho's Greek rendering Ὀννος can be viewed as fairly good, even though it exhibits the typical problems when transcribing Egyptian *w*, which was a sound alien to classical Attic and Koine Greek. It was thus necessary to apply improvised solutions and to render Egyptian *w* with Greek ο, ω, υ, ου or γ,²⁶⁵ and, in this particular instance, Manetho chose ο to render the Egyptian syllabic *w* of *Wnjš*. As a result, the development of the name of the last king of the Fifth Dynasty, from the Old Kingdom to Manetho's *Aegyptiaca*, can be summarised as follows:

Wnjš ~ **W̄nj̄š* > **W̄enj̄š* > **W̄enn̄š* > **W̄enn̄š* >
> **W̄nn̄š* ~ Ὀννος

In addition, Manetho's rendering of this name is remarkable insofar as it does not add the nominative desinen -ς,²⁶⁶ but it makes use of the Egyptian word-final consonant -š#. It is also interesting to note that the syllabic nasal *-η- was transcribed as -vo-²⁶⁷ in Greek thus creating an *o*-stem, which is found only very rarely in Manetho's king-list.

3. Conclusion: The Fifth Dynasty in Manetho's *Aegyptiaca*

The evaluation of the nine royal names which Manetho attributes to his Fifth Dynasty, reveal that the tradition of historiographic material in Egypt was not a subject without any kind of variation but a multi-faceted process with local manifestations and traditions. Even though, with the exception of the Old Kingdom Royal Annals, all branches of historiographic tradition may have started from a courtly list covering the kings of the Thinite Period, the Old Kingdom, the First Intermediate Period and the early Middle Kingdom compiled under Sesostris I,²⁶⁸ local variants developed over time. Even though these local lines of tradition may have been contaminated with the Memphite line of tradition, i.e., that of the court, locally adjusted and reworked variants must have survived. The main branches of tradition known to date are (1) the Memphite tradition covering the Royal Canon of Turin and the king-list of Saqqarah (perhaps both slightly influenced by the Heliopolitan tradition),²⁶⁹ (2) the Abydene tradition covering the Abydos king-list (contaminated with the Memphite tradition)²⁷⁰ and (3) the Heliopolitan tradition represented by, on the one hand, a graffito found in Wadi el-Fawakhir and the Abusir king-list, and, on the other hand, the popular version as found in Papyrus Westcar.²⁷¹ Descendants of all these lines, in part contaminated, were known in Greek times, and Manetho had, at least for the first four dynasties, access to manuscripts of the Memphite-Heliopolitan and the Abydene tradition,²⁷² the latter of which, in a variant massively influenced by the Heliopolitan tradition, was used by Pseudo-Apollodorus/Pseudo-Eratosthenes.²⁷³

For the Fifth Dynasty, the situation is, unfortunately, totally different. Since the Fifth Dynasty and its royal names are, in Greek sources, only preserved in the Manethonian tradition according to Africanus,²⁷⁴ it is very much more difficult to discern the sources Manetho used for the compilation of his Fifth Dynasty. However, there are indications among the royal names themselves which hint at a particularly close relationship to one branch of the Memphite tradition (perhaps influenced by the Heliopolitan tradition), which becomes particularly obvious when Manetho's king-list is compared to the Saqqarah king-list. They both give the full name *Nfr-jrw-k3-Rw* for the third king of the Fifth Dynasty, whereas the Abydos king-list provides the hypocoristicum *K3k3j*,²⁷⁵ and they both reflect the corruption of Renerefere's name which originated in mixing up the full name and the Horus name: *Hrw Nfr-hw x Rw-nfr=f* → *Nfr-hw-Rw* (Manetho) → *Hj-nfr-Rw* (Saqqarah king-list). Nevertheless, the actual representations of this *corruptela* differ so obviously that Manetho cannot have used a copy of the

Saqqarah king-list. This conclusion is further corroborated by the fact that Manetho places *Nj-R^cw-wśr* in the correct sixth place within the sequence of kings, whereas he was omitted in the Saqqarah king-list,²⁷⁶ and that – different from all preserved ancient Egyptian king-lists – *R^cw-nfr=f* was succeeded by *Špss-k3-R^cw* in Manetho's *Vorlage*.²⁷⁷ The *Aegyptiaca* thus pre-serve a separate line of tradition belonging to the Memphite branch which is otherwise unknown.

Most problems with what survives of the *Epitome* of Manetho's *Aegyptiaca* grow from distorted royal names which have suffered from scribal errors in Egyptian (Hieratic, Demotic) and, above all, in Greek. As demonstrated above, the evaluation of Manetho's Greek renderings of Egyptian royal names requires (i) the study of Manetho's source material and of its place in ancient Egyptian historiographic tradition, (ii) the thorough onomastic analysis of the Egyptian names as such, (iii) the reconstruction of their diachronic development, (iv) the critical assessment of what kind of morphological, semantic or ideological re-interpretation or reshaping may have affected them, (v) the investigation of Manetho's convention for transcribing Egyptian phonemes – including the vowels – with Greek characters, (vi) the examination of the phonological development of certain Egyptian grammatical patterns including comparison with the names of commoners and, finally, (vii) the interpretation of the transmitted Greek renderings in the light of more than a thousand years of Greek palaeography and book culture with all its hazards of misspelling, confusing letters, transforming foreign names after the model of common Greek morphological patterns and commonly recognised associations with Greek names or cultural and historical clichés met in Greek literature.²⁷⁸ Turning to the royal names of the Fifth Dynasty, it is important to differentiate between deviations which appeared in the Egyptian phase of tradition, between inaccuracies and errors which occurred in the process of Graecising them and mistakes which befell the manuscripts in the Greek phase of tradition.

In the Egyptian phase of tradition, two royal names suffered from the replacement of semantically relevant elements during the New Kingdom (*Wśr-k3=f* → *Wśr-k3-R^cw*, *Mn-k3.w-Hrw* → *Mn-k3.w-R^cw*),²⁷⁹ and one more name was modernised by means of replacing a morphologically outdated element with a productive one, although this may have been triggered by the particular tradition of Papyrus Westcar (*Nj-R^cw-wśr* → *Nj-R^cw-wśrw*).²⁸⁰ One name was totally garbled and resulted in an amalgamation of two names of the respective king (*R^cw-nfr=f* x *Hrw Nfr-h^cw* → *Nfr-h^cw-R^cw*).²⁸¹ At least four names were affected by grammatical re-analysis during the New Kingdom after the model of contemporaneous throne names²⁸² and by a subsequent morphological modernisation, i.e., the introduction of a Demotic main clause

śdm=f typical for adjective verbs;²⁸³ but all this happened without far-reaching semantic change and with only marginal phonological impact (*Wśr-k3-R̄w*, *Nfr-jrw-k3-R̄w*, *Śpśś-k3-R̄w*, *Nfr-h̄w-R̄w*, perhaps also *Mn-k3.w-Hrw* → *Mn-k3.w-R̄w* and *Ddj-k3-R̄w*).

Right at the crossroads of Egyptian and Greek traditions, two names suffered from difficulties in the process of rendering them with Greek characters due to essentially differing phonological characteristics of Egyptian and Greek, which resulted in rather vague approximations (*Śʒh-wj-R̄w* → Σέφρης, *Wnjś* → Ὄννος).²⁸⁴

In the Greek phase of tradition, one name experienced distortion due to a phonological appearance which did not fit Greek morphological patterns and phonological conventions (*Σιψιχέρης/*Σιψιχέρης → Σισίρης).²⁸⁵ The Greek rendering of two names was changed because of phonological misunderstandings or the confusion of similar looking characters (*Παθούρις → Παθούρης, *Τατιχέρης → *Ταμχέρης > Ταγχέρης (manuscripts: Τανχέρης)).²⁸⁶ And, finally, one name was altered in a complex scenario in order to maintain the king-list's credibility and to emend an assumed mistake of previous scribes which resulted in the deletion of one name (*Νεφερχέρης ἢ Χέρης → Χέρης).²⁸⁷

Why the Fifth Dynasty fell out of almost all lines of tradition which came down to us remains a mystery. The Fourth Dynasty persisted in common memory as a period of kings whose enormous pyramids survived as witnesses of what was perceived as their hubris and cruelty, and the Sixth Dynasty had become a period of some renown because of a reigning queen, which at least the Greeks perceived as remarkable *per se*. Manetho certainly recorded what was remembered at his time, and even in the Epitome, there are glosses addressing the pyramids at Gizah and the reign of queen Nitocris. Accordingly, one would expect some traces of the famous stories known from Papyrus Westcar in Manetho's *Aegyptiaca* and, finally, some glosses on the kings of the Fifth Dynasty in the Epitome. It is difficult to say whether Manetho was unaware of this subject matter, which very distantly echoes history, or whether it formed part of the *Aegyptiaca* but, for whatever reason, did not make it into the Epitome. If the loss of the royal names of the Fifth Dynasty in the king-list of Pseudo-Apollodorus/Pseudo-Eratosthenes really was the result of an instance of *aberatio oculi*, the latter scenario appears much more plausible, and the reshaping of Nirewosers name is also clearly in favour of this. But whatever be the case, the Fifth Dynasty did go short and left no such trace in the Epitome. Later chronographers, who were more interested in regnal lengths than in seemingly endless lists of kings unknown to them and in glosses of unfamiliar historical content, developed a tendency to drop long sequences of royal names without any glosses at all or without glosses of interest for their own purpose. The result was that several kings or even entire dynasties were condensed to summations. Eusebius, who was more prone to this than Africanus, dropped all

royal names of the Fifth Dynasty because they were neither connected to glosses nor the starting point for synchronisms with the Judaeo-Christian world. However, Africanus kept all the royal names of the Fifth Dynasty, and it is a fortunate coincidence that they were copied over and over again down to the *Ecloga chronographiae* of George Syncellus.

It is incontestable that Manetho's *Aegyptiaca* are a piece of ancient historiography which has suffered severely from a long and circuitous way through time. Manetho's king-list thus cannot be read as if it was a telephone book giving names and numbers with absolute reliability. At first, especially during the early days of Egyptology, Manetho's *Aegyptiaca* were often used uncritically and thus became part of an unreflected treatment of written sources.²⁸⁸ But, by contrast, in recent times Manetho's *Aegyptiaca* have been viewed as entirely corrupted and of hardly any value at all.²⁸⁹ In order to avoid either of these tendentious approaches and in order to get closer to information concealed in this fragmentary puzzle, Egyptologists need to consider which information Manetho could have found and what could have happened to the data transmitted. And even though all details found in Manetho's *Aegyptiaca* always require affirmation from contemporaneous sources, the Egyptian king-lists and all other materials available, Manetho's *Aegyptiaca* must not, nevertheless, be put aside. Manetho's *Aegyptiaca* are still an inexhausted source for information on Egyptian history and the ancient Egyptians' way of viewing and processing records of their own past. It is thus not the time to abandon the work on Manetho's *Aegyptiaca*, which have so much to reveal, even if, often enough, information is hidden beyond an arcane veil of time.
