JENAM 2005

Preface	5
<i>Plenary talk</i> - Stellar pulsation: an overview by D. W. Kurtz	6
<i>Invited talk</i> - Observational aspects of asteroseismology by G. Handler	31
<i>Invited talk</i> - Theoretical aspects of asteroseismology by E. Michel	40
Analysis of MERCATOR data - Part I: variable B stars by P. De Cat, M. Briquet, C. Aerts et al.	48
Analysis of MERCATOR data - Part II: variable A & F stars by J. Cuypers, K. Goossens, C. Schoenaers, P. De Cat, C. Aerts et al.	52
A new spectroscopic mode identification method by W. Zima	56
Convection-pulsation interaction: theories and applications by M.-A. Dupret, A. Grigahcène, M. Gabriel and R. Garrido	61
Oscillations of rapidly rotating stars by D. Reese, F. Lignières and M. Rieutord	65
Instability strip for pre-main-sequence stars by A. Grigahcène, M.-A. Dupret, R. Garrido, M. Gabriel and R. Scuflaire	69
Seismic study of the Herbig Ae star HD 104237 by M.-A. Dupret, T. Böhm, M.-J. Goupil, C. Catala and A. Grigahcène	72
The new solar abundances - Part I: the observations by M. Asplund, N. Grevesse and A.J. Sauval	76
The new solar abundances - Part II: the crisis and possible solutions by J. Montalbán, A. Miglio, S. Théado, A. Noels and N. Grevesse	80
Non-local time-dependent treatments of convection in A-G type stars by M.-A. Dupret, R. Samadi, A. Grigahcène, M.-J. Goupil and M. Gabriel	85
Effects of “extra-mixing” processes on the periods of high-order gravity modes in main-sequence stars by A. Miglio, J. Montalbán and A. Noels	89
The ε -mechanism in PMS and MS δ Scuti stars by G. Lenain, R. Scuflaire, M.-A. Dupret and A. Noels	93
Spectroscopic study of the pulsations in the roAp star HD 24712 by M. Sachkov et al.	97
Excitation of oscillations in roAp stars: the roles of He settling and winds by S. Théado and M. Cunha	101

Radiative forces and pulsations in β Cephei stars	105
by P.-O. Bourge, G. Alecian, A. Thoul, R. Scuflaire and S. Théado	
A line-profile analysis of the large-amplitude β Cephei star ξ^1 Canis Majoris	109
by S. Saesen, M. Briquet and C. Aerts	
An asteroseismic study of the β Cephei star β Canis Majoris	113
by M. Desmet, M. Briquet, A. Mazumdar and C. Aerts	
Polytropes as simple models of β Cephei stars	117
by M. Godart, R. Scuflaire, A. Thoul and A. Noels	
Radial velocity variations in K giants: planets or pulsations?	121
by S. Hekker, S. Reffert and A. Quirrenbach	
ADDITIONAL ARTICLES	
An extensive study of the photometric behaviour of RV Tauri variables	126
by E. Paunzen, I.L. Andronov, L.L. Chinarova, M. König and M. Rode-Paunzen	
A new tool for the seismic investigation of γ Doradus stars	129
by A. Moya, J.C. Suárez, P.J. Amado, S. Martín-Ruiz, A. Grigahcène and R. Garrido
