

Contents

Preface	iv
1 Overview <i>Michael Wiegand, Melanie Siegel & Josef Ruppenhofer</i>	1
2 Offensive Language without Offensive Words (OLWOW) <i>Manfred Klenner</i>	11
3 h_da Submission for the Germeval Shared Task on the Identification of Offensive Language <i>Melanie Siegel & Markus Meyer</i>	16
4 Saarland University's Participation in the GermEval Task 2018 (UdSW) – Examining Different Types of Classifiers and Features <i>Michael Wiegand, Anastasija Amann, Tatiana Anikina, Aikaterini Azoidou, Anastasia Borisenkov, Kirstin Kolmorgen, Insa Kröger & Christine Schäfer</i>	21
5 Challenges of Automatically Detecting Offensive Language Online: Participation Paper for the Germeval Shared Task 2018 (HaUA) <i>Tom De Smedt & Sylvia Jaki</i>	27
6 KAUSTmine - Offensive Comment Classification on German Language Micro-posts <i>Matthias Bachfischer, Uchenna Akujuobi & Xiangliang Zhang</i>	33
7 Fine-Grained Classification of Offensive Language <i>Julian Risch, Eva Krebs, Alexander Löser, Alexander Riese & Ralf Krestel</i>	38
8 TUWienKBS at GermEval 2018: German Abusive Tweet Detection <i>Joaquín Padilla Montani & Peter Schüller</i>	45
9 Feature Explorations for Hate Speech Classification <i>Tatjana Scheffler, Erik Haegert, Santichai Pornavalai & Mino Lee Sasse</i>	51
10 Offensive Language Detection with Neural Networks for Germeval Task 2018 <i>Dominik Stambach, Azin Zahraei, Polina Stadnikova & Dietrich Klakow</i>	58
11 RuG at GermEval: Detecting Offensive Speech in German Social Media <i>Xiaoyu Bai, Flavio Merenda, Claudia Zaghi, Tommaso Caselli & Malvina Nissim</i>	63

12	upInf - Offensive Language Detection in German Tweets <i>Bastian Birkeneder, Jelena Mitrović, Julia Niemeier, Leon Teubert & Siegfried Handschuh</i>	71
13	InriaFBK at Germeval 2018: Identifying Offensive Tweets Using Recurrent Neural Networks <i>Michele Corazza, Stefano Menini, Pinar Arslan, Rachele Sprugnoli, Elena Cabrio, Sara Tonelli & Serena Villata</i>	80
14	Transfer Learning from LDA to BiLSTM-CNN for Offensive Language Detection in Twitter <i>Gregor Wiedemann, Eugen Ruppert, Raghav Jindal & Chris Biemann</i>	85
15	Towards the Automatic Classification of Offensive Language and Related Phenomena in German Tweets <i>Julian Moreno Schneider, Roland Roller, Peter Bourgonje, Stefanie Hegele & Georg Rehm</i>	95
16	HIiwiStJS at GermEval-2018: Integrating Linguistic Features in a Neural Network for the Identification of Offensive Language in Microposts <i>Johannes Schäfer</i>	104
17	ULMFiT at GermEval-2018: A Deep Neural Language Model for the Classification of Hate Speech in German Tweets <i>Kristian Rother & Achim Rettberg</i>	113
18	German Hate Speech Detection on Twitter <i>Samantha Kent</i>	120
19	CNN-Based Offensive Language Detection <i>Jian Xi, Michael Spranger & Dirk Labudde</i>	125
20	spMMMP at GermEval 2018 Shared Task: Classification of Offensive Content in Tweets using Convolutional Neural Networks and Gated Recurrent Units <i>Dirk von Grunigen, Fernando Benites, Pius von Däniken, Mark Cieliebak & Ralf Grubenmann</i>	130
21	GermEval 2018: Machine Learning and Neural Network Approaches for Offensive Language Identification <i>Pruthwik Mishra, Vandan Mujadia & Soujanya Lanka</i>	138
